Acknowledgements

“Those who love hard work and love it because it is hard,
Those who try and fail and keep on trying,
Those who suffer loss of months of hard labor and start all over again,
Those who cannot be discouraged no matter whatever happens,
Are invited to undertake RESEARCH”

This is perhaps the easiest and hardest chapter that I have to write. It will be simple to name all the people that helped to get this done, but it will be tough to thank them enough. I will nonetheless try…

First and foremost, I would like to express my deep and sincere gratitude to my PhD supervisor Dr. Ranju Bansal, Associate Professor of Pharmaceutical chemistry for her invaluable guidance, inspiration, encouragement and delightful response right from inception to the successful completion of this research project. The insight and dynamism with which she guided the work requires no elaboration. I appreciate all her contributions of time, ideas and funding to make my Ph.D. research productive and stimulating. The joy and enthusiasm she has for research is contagious and motivational for me, even during tough times in the Ph.D. pursuit. I could not have imagined having a better advisor and mentor for my Ph.D study. I owe her lots of gratitude for having me shown this way of research.

I wish to acknowledge Prof. V. R. Sinha, Chairperson and Dean, Faculty of Pharmaceutical Sciences and Prof. Karan Vasisht, former Chairperson, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh for providing congenial working atmosphere and excellent laboratory facilities. I am also thankful to all the faculty members for the constant encouragement and unwavering support, especially Dr Poonam Piplani, for valuable suggestions and friendly morale booster appreciations.
It is a matter of profound privilege and pleasure to thank Prof. Rolf W. Hartmann, Professor, Pharmaceutical and Medicinal Chemistry, Saarland University, Germany for carrying out aromatase inhibitory activity of our compounds. I extend my warm appreciation to Dr. Hema Raghu, Department of Physics, Seethalakshmi Ramaswami College, Tiruchirappalli, India for carrying out the crystallographic studies of our compounds.

The Junior Research Fellowship of Department of Science and Technology (DST), New Delhi and Senior Research Fellowship of Council of Scientific and Industrial Research (CSIR), New Delhi is gratefully acknowledged. I am thankful to Cipla Ltd., Mumbai for generous supply of steroids.

The technical support and cooperation extended to me particularly by Mr. Avtar Singh (CIL), Mr. Kishori Lal, Mr. Dharmachand, Ms. Ranjit Kaur, Mr. Shadi Lal, Mr. Pritam Chand, Mr. Ravinder, Mr. Ramashankar, Mr. P. D. Chaudhary and Mr. Dayal is respectfully acknowledged.

Today is the perfect occasion to admit that having Kiran Kumar Akula, Abhijeet, Rajnish, Pratap, Abhineet, Vinay, Prasada Rao, Vijay and Yogi for my friends is undoubtedly one of the best things that ever happened to me. In good times, their enthusiasm added to my joy and in troubled times, they know just the perfect way to show their care.

I extend my bottled up emotions to Dr. Tejvir Singh, Dr. Satyanarayana, Dr. Anurag, Ramgopal, Venkat Rao, Bala Kumar, Laxman, Vinod, Vipin, PKD, Rajwinder, Astha, Poonam, Rajkumar, Mamta and Swati. I thank them all for alleviating my morale during hard times and making this tenure thoroughly an enjoyable and memorable one.

I also wish to express my gratitude to my labmates Pratap, Deepika, Rakesh, Suman, Chanda, Jyoti and to my juniors Puneet, Shaffali, Aditi, Simran, Umesh, Amit and Gaurav who made my stay pleasant and peaceful in the lab.

A special word of thanks to my junior and friend Deepika Sharma for her wonderful company and help during my study and dissertation work.
Finally, I want to thank **my parents**, who have always taught me the value of sincere efforts and hardwork. I would like to share this moment of happiness with my father, mother, brothers and in-laws. Without their loving support, patience, understanding, timely guidance and blessings, nothing would have been possible during the whole tenure of my career in Panjab University. I owe a lot to them. Words fail me to express my appreciation to my loving wife **Priyanka** who is a constant source of inspiration and love. I am thankful for all the support that she gave me during the years. Mere words can not express her contribution in my life.

Last but not the least, there are no words to pay obeisances to GOD.
