ACKNOWLEDGEMENT

The word grateful is not great enough to say how grateful indeed I am to Dr. Pramod Kumar, my teacher, supervisor, guide and friend, who accepted the responsibility of supervising this work without any hesitation and guided me every minute till the last. Everytime I went to call on him, I knew that I am encroaching upon his hard earned leisure time but both Dr. and Mrs. Kumar always welcomed with an understanding smile.

My sincere thanks are due to Prof. Arora for the permission given and facilities provided for this work. I am also thankful to Dr. Vidhu Mohan and Dr. Jitender Mohan for the encouragement given.

My special thanks are due to Dr. Dwaraka Prasad who introduced me to Dr. Kumar. He did not just take the horse to the water but many a time made it drink too!

I thank Dr. S.K. Verma for the interest he evinced in and the encouragement he provided for this study. I am also thankful to Mr. Randhir Singh for the facilities provided for the study during the speech and hearing camps.
I gratefully acknowledge the help and cooperation of Mr. M.I. Belawalagidada (Mallesh) of the department of Bio-Statistics and Mr. Behl of the Computer Centre.

Mr. Raghunath enabled me to concentrate on this work better by sharing my clinical and administrative responsibilities and I am thankful to him for the same. I am also thankful to (my?) old students Rajni and Prasad and to Malini, Enakshi, Bindu, Parminder, Paramjit, Anu and Remu, (my?) present students for the little great and the great little help they provided.

I have, by no means, mentioned the names of all the people who have helped me in this venture of mine. Some asked me not to include their names in the acknowledgement since it would be too formal (Lakshmi, my wife, Hari and Giri my sons, for example) while others resented inclusion because they were afraid, public acknowledgement would mean more people going to them for help (Mr. Bhatnagar and Mr. Sabharwal of the PGI, Mr. Anand of the Electrotech Corporation, Mr. Govindrajam of the Mysore Speech and Hearing Institute, Satyender and Srinivas of the Delhi Medical Institute, for example). So I thank all those who, directly or indirectly, were responsible for the successful completion of this study.

Last, and definitely not the least, I thank those one hundred and thirty eight young men, twelve ladies and their one hundred and fifty parents who participated in the study as subjects.

(Gudi S as)
