Acknowledgements

It gives me an immense pleasure to express my sincere thanks and gratitude towards my revered teacher and guide Professor S.S. Handa, M. Pharm. Ph.D. (London), Director Regional Research Laboratory, Jammu. But for his unfailing encouragement, persistent support, stimulating guidance and critical evaluation, it would not have been possible for me to bring this piece of research to a logical end. Despite his busy schedule, his constant motivation and spiritual guidance were a big source in nurturing inspiration into me.

I am very grateful to Dr. O.P. Suri in supplementing my research work with his inciting reviews. I am also thankful to Dr. Anupam Shara for his continual cooperation and critical suggestions which were of great help. My special thanks are due for Dr. Bedi for his kind help all through my stay at Jammu.

I am greatly indebted to all my labmates for their ever helping stance, in particular, Dr. Deepa and Mrs. Amandeep without whom my getting along would have been difficult in the hours of despair. I am in all praise for Ms. Archana Bahri for helping me in correcting the typed manuscript.

I find no words to express the sincere affection and unflagging support from my dear husband Lalit. His forbearance instilled a lot of confidence in me to go through different phases of this research work. Further, my sincere thanks are also due to my parents and parents-in-law for their unstinting encouragement and kind blessings. I am also grateful to Mrs. Usha Handa who always showered her motherly blessings and connected me with her cheerful and positive attitude towards life.

The help and facilities extended to me by Regional Research Laboratory, Jammu and University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh are gratefully acknowledged. I also thank the Chairman, UIPS and the Chairman, Department of Chemistry, PUS Chandigarh for providing necessary infrastructure and support for carrying out the research work. The financial support from ICMR Centre for Advanced Research is duly acknowledged.

The help rendered by the people at NAVAC especially Mr. Surinder Paul Singh and Mr. Ravi Sharma for skillful typing of this manuscript is duly acknowledged.
