LIST OF TABLES

1. Raw material used for the preparation of Ksharsootra.
2. Column chromatography of hexane extract (DOOl).
3. Column chromatography (by suction) of F003.
4. Column chromatography (by suction) of F013.
5. Raw material requirement for preparing a batch of 1000 Ksharsootra.
8. Calibration plot data of turmeric by spectrophotometry.
15. Latex. Mean *±S.D. for various physico-chemical parameters.
17. Turmeric. Mean *±S.D. for various physico-chemical parameters.
18. Parameters chosen for the in-process quality control and coatings at which analysis was done.
19. In-process quality control of Ksharsootra. Mean values of various parameters after successive coatings.
20. Calibration plot data of curcumin by TLC densitometry.
22. Calibration plot data of euphol by TLC densitometry.
25. Planned accelerated stability studies. Mean curcumin content.
26. Correlation coefficients and $r^2$ values of curcumin in Ksharsootra for zero order and first order kinetics.
27. Shelf life of Ksharsootra from accelerated stability studies.
29. Limits of various parameters for Ksharsootra and its raw material.
