ACKNOWLEDGEMENTS

My heart today overflows with gratitude that is silent but deeper than anyone knows. It is a pleasure to thank all of those who made this thesis possible. I face a tremendous paucity of words that are required to describe my deep sense of indebtedness, gratitude, emotions, pride and a rare privilege to work under the guidance of two of the best teachers, Late Professor P.D. Sharma and Professor T.R. Bhardwaj. Their ever encouraging attitude and keen interest in the research helped in maintaining the tempo through my Ph.D. period.

First of all, I pay homage to Late Professor P.D. Sharma for his compassion and bountiful blessings that made me see this wonderful moment. Mere words are not enough to express my admiration for him. His sage advice often served to give me a sense of direction during Ph.D. studies. His brilliant ideas and intelligent criticism proved to be of immense value throughout the course of this study. Also his patient encouragement aided the completion of this thesis in innumerable ways. Above all, he has shaped my attitude, nurtured me with discipline and light. Thank you, Sir for giving me the strength to carry on in spite of all the difficulties, which I came across. You have made me believe in me.

There are no words to match my gratitude to the pillar of learning, my revered guide, Prof. T.R. Bhardwaj for creating an environment essential and conducive for rewarding research work. His perpetual encouragement, patience, pleasant discussions, inspiration, moral support and care during entire tenure of my research has helped in bringing out the best in me. Throughout my thesis writing period, he provided encouragement, sound advice, good teaching and lots of good ideas. I would have been lost without him.

Thanks are due to Professor Xaran Vasisht, Chairman, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh, for his kind support and for providing me with all the excellent facilities needed during my research. I also thank Dr Tejvir Singh, Department of Chemistry, Panjab University, Chandigarh for his timely & illuminating guidance and suggestions that solved the problems related to my work area. I owe a special gratitude to all the faculty members of University Institute of Pharmaceutical Sciences, for their support and encouragement.

The research fellowship received from the University Grants Commission, New Delhi is gratefully acknowledged.

It is impossible to forget the technical support and cooperation extended to me by Mr Dhruv Dev, Mr Kishori Lal, Mr Ravinder Kumar, Mr Rama Shankar, Mr Sushil, Mr Shadi Lal, Mr Skyam Singh, Mr Saheb Singh, Mr Sudesh Rana, Mr Sethi. I take opportunity to thank Mr P.D.Chaudary (Librarian), Mr D.Ay, Mrs Kiran, Mrs Usha, Mrs Renu, Mr JR and Mr Jindal for their unforgettable help during my stay in this institute. I would like to express my sincere thanks to Mr Avtar Singh and Mr Jagtar Singh, Sophisticated Analytical Instrument Facility, and Ms Ranjeet Kaur for their help in carrying out spectral and elemental analysis during this work. They have opened their hearts and their doors, supplying me with resources I never could have found without them.
Word of thanks are also due to my sincere friends Smita, Garima, Ritu, Sonali, Jitender, and Shikha for their support, caring words and for contributing to valuable ideas and discussions. This research also benefited tremendously from cheerful assistance from my friends, Senthil, Sandeep, Manu Sharma, Neeraj, Benu, Manu bhaiya as hours were spent discussing fruitful ideas at the campus. Thanks are due to Rajwinder, Mamta Mam, Nidhi, Rajeev, Shalju, Sushma mam, Poonam, Astha and all my juniors, who kept me cheerful. I thank them for giving me their helping hands whenever and wherever it was required.

Words are insufficient to verbalize my gratitude and regard towards the persistence and patience of my dear parents whose unrelenting support and endurance motivated me to carry out my work to completion. I shall remain indebted to their love and blessings, who soulfully provided me their constant support and right impetus to undertake challenge of this proportion, like in all other spheres of life, which I cannot measure but treasure. When my moral ebbed, enthusiasm waned it was maa pa who helped me getting out of it, a debt that can never be paid. I take this opportunity to express my sincere love and gratitude to my dear brother Dhruv for his consistent faith and confidence in whatever I propose to do, overwhelming support and encouragement.

Last but not the least, there are no words to pay obeisance to the 'Lord Almighty', for blessing me with energy, enthusiasm, peace and good health which paved the way for the successful completion of my research work.
