Acknowledgements...

I did not know that research is such a fulfilling, satiating and gratifying experience till I actually ventured into it wholly. Now I personally feel that research is not entirely an endeavor to accomplish the desired goals, but also learning from every inch of the path treaded for the purpose. However, the 'path' is often arduous, long, monotonous, bumpy, and full of uncertainties. Hence, one needs the guidance of experienced and intuitive commuters of this path, and some affable companies to reach the destination. It is a pleasant moment that I have now the opportunity to express my gratitude for all of them.

It is indeed a rare privilege to have worked under the expert guidance of Professor Renu Chadha, an eminent teacher and connoisseur in the field of pharmaceutical chemistry. It is my privilege to have been associated with her for the past 6 years as her post graduate and doctoral student. During these years, I have developed a special veneration to my supervisor who is companionate in nature and committed to her profession. Her guidance, encouragement, criticism, discussions, inspiration, moral support and care not only gave a right direction to the execution of this work, but also contributed to my personal grooming as a researcher. I am always grateful to her for sharing her valuable expertise in pharmaceutical chemistry research and in the art of writing manuscripts. The days spent with her have left an indelible impression in my heart which I will cherish throughout my life.

Thanks are due to Professor Karan Vasisht, Chairman, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh, for providing me with all the excellent facilities needed during my research work.

I also thank Professor O.P. Kataria, Ex-Chairman, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh, for his tremendous support and encouragement throughout my stay at UIPS.

I owe a special gratitude to all the faculty members of UIPS, for their timely help, guidance, support and encouragement, whenever and wherever needed.

It is a matter of profound privilege and pleasure to thank Professor Emeritus DVS Jain, Department of Chemistry, Panjab University, Chandigarh, for furnishing supervisory impetus
and sharing his pearls of wisdom. He always remains a source of knowledge and his comments on
the manuscript drafts themselves generated a critical thought upon process in me which helped me
alot.

I also thank Professor P Venugopalan, Professor, Department of chemistry, Panjab University,
Chandigarh, for carrying out the single crystal analysis for one polymorphic and one
solvatomorphic form prepared during my research work.

The technical support and cooperation extended to me particularly by Mr Ravinder Singh, Mr.
Kishori Lal, Mr Rama Shankar, Mr Sushil Kumar and Mr Dhruv Dev is gratefully acknowledged. Sincere regards to Ms Ranjit Kaur for her unforgettable help during my research
work.

I would also like to thank, Mr P.D. Chaudhary, Librarian, University Institute of
Pharmaceutical Sciences, Panjab University, Chandigarh, for his cooperation.

I would like to express my sincere thanks to Mr Avtar Singh, Mr Jagtar Singh and Mr Mahender
Singh, Central Instrumentation Laboratory, Panjab University.

The financial support provided by Department of Science and Technology, New Delhi and
Council for Scientific and Industrial Research, New Delhi, is gratefully acknowledged.

I also acknowledge all those researchers, scientists and other people who have worked and
published various books, journals and patents, I have referenced from.

From the core of my heart I highly appreciate the cheerful assistance of all my teammates,
Anupam, Swati, Astha, Sushma, Mamta, Rajwinder, Preetkamal, Kesar Raza, Ruchita and
Saurav who made this journey of research most cherishable. The unwavering support and cheerful
companionship of my juniors Aarti, Deepika, Sumit, Esha, Madhu, Monika, Rekha, Natasha,
Somnath, Darpan, Kunal, Ashish and Abhimanyu during my research work is sincerely
appreciated.

Words are insufficient to verbalize my gratitude and regard towards the persistence and patience
of my dear parents-in-law whose unrelenting support and endurance motivated me to carry out
my work to completion. I shall remain indebted to their love and blessings. The chain of gratitude
would be incomplete without the mention of Manoj bhaiya, Neetu bhabi, Kundan ji ji, Happy
didi, Onkar ji ji and Priya didi for always believing in me and uplifting my moral during whole tenure. Love of little angels Jhanavi, Shubham, Mansi, Gautam, Sachin and Rhythm is invaluable.

I find it difficult to pen down my deepest sense of indebtedness towards my mummy and papa who soulfully provided me the direction, support and right impetus to undertake challenge of this proportion. My papa made me to walk on this path and achieve the success. I take the opportunity to express my sincere love and gratitude to my dearest brother Amit, his wife Meenakshi, my elder sister Munisha and Bhushan ji ji for their consistent faith, confidence, overwhelming support and encouragement.

I am actually falling short of words to express my deepest sense of appreciation for my husband, Gagan, for all his love, inspiration, encouragement, help, moral support and adjustments. All I can say is that I owe a lot to him for being my driving force and believing in me. I don't know if my daughter, Samriddhi would be able to forgive me for my long stay at the laboratory though she endured my absence very patiently and her angelic smile imbied in me the spirit to work harder.

Last but not the least I would like to pay my obeisance to THE ALMIGHTY without his grace this work would not have been possible.

I thank all for always being there.
