  Administration of Tools
  Analysis of Data
Chapter IV ANALYSIS AND INTERPRETATION OF DATA

Mean differences in school climate between elementary and secondary schools

Mean differences in leadership behaviour between heads of elementary and secondary schools

Mean differences in moral development between heads of elementary and secondary schools

Variabilities in school climate of elementary and secondary schools

Variabilities of heads of elementary and secondary schools in leadership behaviour

Variabilities of heads of elementary and secondary schools in moral development

The scores of teachers from each elementary and secondary school on the dimensions of school climate

Means and S.D.s. of all elementary and secondary schools on the dimensions of school climate

Summary of analysis of variance in respect of elementary and secondary school teachers' perception of the dimensions of school climate
The scores of teachers from each elementary and secondary school on the dimensions of leadership behaviour

Means and S.D.s. of all elementary and secondary schools on the dimensions of leadership behaviour

Summary of analysis of variance in respect of elementary and secondary school teacher's perception of dimensions of leadership behaviour

Mean scores of heads of each elementary and secondary school on moral development

Correlation between eight factors of school climate of elementary and secondary schools

Correlation between factors of leadership behaviour of heads of elementary and secondary schools

Correlation between factors of school climate, leadership behaviour and moral development of elementary and secondary schools

v SUMMARY, CONCLUSIONS AND RECOMMENDATIONS 264-288

Summary
Hypotheses
Method and Procedure
