Acknowledgement

This report is outcome of research study undertaken by me under the guidance of eminent personalities in the field of Production Engineering. There are many individuals who directly or indirectly supported me in this endeavour. However, there are few people whose efforts went far beyond expectations and I would like to thank those individuals for their help and co-operation.

I would like to express my deep sense of gratitude to my research guide Dr. B.B. Ahuja (Dy. Director, College of Engineering, Pune), for his continuous guidance, inspiration, immense support and timely suggestions. He always kept my morale up and provided the vision. He has been a constant source of help and inspiration to me. I am grateful to him for giving me liberty in the work undertaken, and he has been extremely supportive and understanding at all times. It was indeed my privilege to have worked under him. Although this eulogy is insufficient, I preserve an everlasting gratitude to him.

I am deeply indebted to Dr. S. K. Basu (Prof. Emeritus, Dept. of Prod Engg., COE, Pune) for his many constructive inputs and valuable guidance.

I am thankful to Dr. A.D. Sahasrabudhe (Director, COE, Pune) for providing support, encouragement and help in completing my thesis.

I am greatly thankful to our Head of the Department Dr. (Mrs.) N. R. Rajhans for her continuous encouragement and support during the work.

I am also thankful to Dr. L. G. Navale, Retd. Prof. and Head, Department of Production Engg., COEP, Dr. P. P. Chikate, Professor Emeritus and Prof. K. G. Patil, Adjunct Professor for their valuable inputs from time to time and also thankful to Dr. S. N. Sapali, Dr. M. J. Rathod for their suggestions and discussions during my progress seminar presentations.

I would like to thank my colleagues in the Department of Production Engineering, Dr. (Mrs.) A. V. Mulay, Dr. M. D. Jaybhaye, Dr. B. U. Sonawane, S.M. Patil, S. U. Ghunage, S. S. Anasane, J. S. Karajagikar, Mrs. Aarti Paygude for their constant help and motivation in completing my thesis and special thanks are due to Dr. Rajiv B. who helped me all the time at various stages during my work.
I am thankful to Mr. V. T. Thavale, Asst. Prof. Metallurgy Dept. COEP and Dr. R. K. Goyal, Asso. Prof. Metallurgy Dept. COEP for extending help in carrying out microscopic observations and Dr. Preetam S. Kalos Asso. Professor, K.K. Wagh College of Engineering and Research Nasik, for helping me to understand MATLAB software and optimization techniques.

I would also like to thank all the workshop staff for their help during the experimentation.

My heartfelt appreciation to Yogesh Kamble, Saket Joshi and Shreeganesh Mangalwedhe for their assistance during my work.

I am thankful to the Premier Ltd. Pune for donating Vertical Machining Center PVM 40 and CMM to the Production Engineering Department, COE, Pune that helped me to develop experimental setup to conduct the experiments and carry out measurements.

I am grateful to all the staff members of Dept. of Production Engineering, College of Engineering Pune, for their continuous support and guidance.

I am also thankful to my elder brother Mr. C. D. Pantawane and my elder sister Mrs. D. B. Gajbhiye who motivated me for higher studies. I am deeply indebted to my parents, Mr. Dasharath A. Pantawane and Mrs. Vatsala D. Pantawane, my beloved wife Monali and son master Neer. I hope that you know how much your love, support and patience has meant to me while this research work was in process. Words alone can never completely express my gratitude.

There are many others left, whose direct and indirect involvement has helped me to complete this research work, I thank them all.

Prakash Dasharath Pantawane
