Acknowledgement

This dissertation is the end of a research project. It has brought upon me many indebts of gratefulness in all the endeavors along the way, which I excitedly want to acknowledge! Prof. Nazir Ahmed Dhar, my supervisor, was the first to bring the exciting topic of role of media in language contact to my attention, stressing its relevance to both linguistics and media. Most of the core ideas of my research emerged in conversations with him, and his appreciation, comments and check, throughout has led to many improvements. Especially I like his way of ‘not talking’ when I was in sort of hibernation, that rushed me to start work and write. On this research work, his thoughtful discussions have always brought me to major conceptual changes over the years I have spent at University of Kashmir. At home, Prof Nazir Ahmad Dhar together with his affectionate wife and their beautiful children Safwan and Zahran, hosted me with care and guided me... loads of thanks for such a lovely environment.

In addition, I am grateful to Prof Nazir Ahmad Dhar, for keeping me employed as contractual lecturer during my last four years at Department of Linguistics. Thanks, for doing so much, otherwise it would not have been possible for me.

Literally I don’t have words to thank my supervisor for teaching and guiding me. Thank you for challenging cherished ideas, for your support all the way.
