LIST OF TABLES

CHAPTER III

Table 3.1. Details of the primers used for the amplification.

CHAPTER IV

Table 4.1.2.1. Chemical composition (%) of *Cephalotaxus griffithii* needle essential oil.

Table 4.1.2.2. IC$_{50}$ value of *Cephalotaxus griffithii* needle essential oil on different human cervical cancer cell lines.

Table 4.2.1.1. TPC and TFC of CGB extracts.

Table 4.2.1.2. IC$_{50}$ values of different antioxidant assays of CGB extracts.

Table 4.2.1.3. Antibacterial activity of different CGB extracts.

Table 4.2.1.4. MIDs of different CGB extracts.

Table 4.2.1.5. Effect of CGB extracts (80 µg/ml) on sub-G$_0$/G$_1$ in HeLa cells.

Table 4.2.1.6. Simple correlations (r value) between TPC and TFC in the CGB extracts and their DPPH IC$_{50}$ and MTT IC$_{50}$ values and sub-G$_0$/G$_1$ population.
Table 4.3.1.1. Total phenolic and flavonoid contents of OIB extracts.

Table 4.3.1.2. IC50 values of different antioxidant assays of OIB extracts.

Table 4.3.1.3. Antimicrobial activity of three solvent OIB extracts.

Table 4.3.1.4. The minimum inhibitory concentration of different solvent extracts of OIB.

Table 4.3.1.5. Simple correlations (r value) between total phenolic, total flavonoid in the three solvent extracts of OIB and their DPPH IC50 and MTT IC50 values.

Table 4.3.3.1. IC50 value of oroxylin A in cancer and normal cells.
