## List of Illustrations

1.1. Reduction of a carbonyl group to an alcohol group 3
1.2. Structure of N-terminal fragments of GPA (M and N) and GPC 12
1.3. Mechanisms of immune response to small molecules 14
1.4. Mechanism of immediate hypersensitivity to sugar alcohol (D-mannitol) 26

2.1. Molecular structure and chemical formula of erythritol 30
2.2. Preparation of erythritol-bovine serum albumin (BSA) conjugate by reductive amination at pH 8 and 37°C 44
2.3. Immunochemical analyses of rabbit antiserum to erythritol-BSA conjugate 45
2.4. Purification of erythritol-specific antibodies using hapten-affinity chromatography 46
2.5. Binding curves and isoelectric focusing of anti-erythritol antibodies 47
2.6. Specificity of the purified antibody as determined by inhibition enzyme-linked immunosorbent assay (ELSIA) 48
2.7. Structural similarities of meso-erythritol, dithioerythritol, D-threitol and L-threitol. The percent cross-reactivity is shown in parenthesis 50

3.1. Molecular structure and chemical formula of D-xylitol 54
3.2. Preparation of D-xylitol-bovine serum albumin (BSA) conjugate by reductive amination at pH 8 and 37°C 69
3.3. Immunochemical analyses of rabbit antiserum to xylitol-BSA conjugate 70
3.4. Purification of xylitol-specific antibodies using hapten-affinity chromatography 71
3.5. Comparison of binding curves for affinity-purified xylitol antibodies with xylosyl-BSA / xylitol-BSA conjugates 72
3.6. Immunochemical analyses of affinity-purified xylitol antibodies 73
3.7. Passive cutaneous anaphylaxis assay 75

4.1. Competitive ELISA assay method 82
4.2. Indirect competitive ELISA assay method 83
4.3. Detection of meso-erythritol in watermelon 3K-ultrafiltrate by Ca$^{2+}$-ion moderated Dowex-50 W cation exchange chromatography 88
4.4. Gas-liquid chromatography analysis 89
4.5. Calibration curve obtained for meso-erythritol using indirect competitive ELISA 90

5.1. Elution profile of polyol from anti-xylitol IgG Sepharose CL-6B immunoaffinity column 102
5.2. Confirmation of D-xylitol in the eluate (from the immunoaffinity column) by ion-moderated Dowex-50 W cation exchange chromatography 103
5.3. Gas-liquid chromatography (GLC) analysis 104
5.4. Calibration curve for D-xylitol in indirect competitive ELISA 105
