ACKNOWLEDGEMENT

I acknowledge with thanks the kind help, interest and continued encouragement shown by Prof. R. S. Krishnan, M.A., D.Sc., Ph.D. (Cantab.), F.N.I., F.A.Sc., without which I could not have carried out the investigations described in this Thesis. I am deeply indebted to Dr. S. Ramaseshan, M.Sc., A.I.I.Sc., D.Sc., for some useful discussions and to Mr. V. M. Padmanabhan, M.Sc., A.I.I.Sc., for his help in the preparation of the photographic reproductions.

I am grateful to the authorities of the Indian Institute of Science, Bangalore and to the Government of India for the award of scholarships.
