Acknowledgements

It is with the utmost regard and sincerity I take this opportunity to express my deep sense of gratitude to Dr. Sandhya Mishra (Senior Scientist, Principal Supervisor) and Dr. N. H. Khan (Principal Scientist, Co-supervisor) who provide me an opportunity to join their group and directed me with their scholarly and infallible guidance throughout the doctoral research work. Their enthusiasm, inspiration and great efforts to translate the solution of problems transparently, helped me to understand the several aspects of chiral chemistry and its utilization in biological systems, which ultimately enhanced my scientific thinking and power to understand the concepts and problems associated with the synthesis of chiral complexes and their interaction with biological molecules. Their support and open mind for new perceptions, freedom to explore new ideas, valuable timely suggestions and finally the patience and care they had with me made myself strong enough to complete the task productively.

I wish to express my warm and sincere thank to Dr. R. I. Kureshy and Dr. S. H. R. Abdı, who always helped me by sharing their in-depth knowledge in the field of chiral chemistry and catalysis. Thank you doesn’t seem sufficient but it is said with appreciation and respect.

I am indebted to Dr. H. C. Bajaj, Chief Scientist, Head and Co-ordinator, Discipline of Inorganic Materials and Catalysis for his kind support and providing facilities to carry out the research work and also for continuous encouragement with his kind words and deeds.
