ACKNOWLEDGMENT

Words are inadequate to express my sincere thanks and profound gratitude to my Research Supervisor and Guide, Dr. G. Gopal, Professor and Head, Department of Statistics, University of Madras, Chennai. His unstinted cooperation by sparing unlimited time for part-time students like me, well past his office hours, is unmatched. I am indebted to him, for his invaluable guidance, constructive comments and immense patience.

I owe my position entirely to Dr. V. Shanta, Executive Chairman, Cancer Institute (W.I.A), Chennai. She has been a constant source of motivation and encouragement to me on all the aspects for pursuing my doctoral research. I thank her for permission to utilize the required data from the hospital and population based cancer registries.

My special thanks are due to Dr. K. N. Ponnuswamy, former Professor and Head, Department of Statistics, University of Madras, Chennai, for facilitating the formal registration for doing research in the department. The retired professors of the department, Dr. K. Suresh Chandra and Dr. J. Ranganathan, deserve praise for their words of wisdom.

The research scholars of the Department of Statistics of University of Madras have been extremely fortunate to get the unsolicited support of the entire faculty members comprising Dr. P. Dhanavanthan, Dr. M.R. Srinivasan, Dr. T. Anbupalam and Ms. M.R. Sindumol. I am very grateful to each of them for
all their help. I am thankful to Mr. Ramadurai, Technical Assistant, for all the assistance. The secretarial assistance of the administrative staff of the department is greatly appreciated.

I shall be failing in my duty if I do not recognize the wholehearted support provided by the staff of the Division of Epidemiology and Cancer Registry, Cancer Institute (W.I.A), Chennai. My sincere thanks to Dr. Gajalakshmi Vendhan, Associate Professor and Head, for her cooperation; Dr. K. Ravichandran, my ex-colleague, for his suggestions; Mr. S. Devarajan, computer programmer, for his computing assistance; Ms. R. Rama, Statistical Assistant and Mr. Jayachandran, Assistant, for their help. I am extremely grateful to a host of social investigators, who were responsible for high quality data collection from patients, without which, this dissertation would not have been a reality.

I fondly recall my father's wish to see his son get a Ph.D. Though he is not alive now, I firmly believe that he had been the guiding spirit in my endeavour. I owe my gratitude to my mother, wife and son for their fullest cooperation and support.

R. Swaminathan
