ACKNOWLEDGEMENT

I express my profound sense of gratitude to my teacher and Research Supervisor Dr. Sadanand M. Yamakanamardi, Professor, Department of Studies in Zoology, University of Mysore, Manasagangotri, Mysore, under whose guidance the present work was undertaken. Without his kind co-operation, unstinted encouragement, constructive criticism and careful supervision, the completion of this thesis work would not have been possible.

I am thankful to the present Chairman, Prof. S. N. Hegde, and former Chairpersons of the Department of Studies in Zoology, Prof. H.A. Ranganath, Prof. Prakash. R. Naik, and Prof. Sadanand. M. Yamakanamardi, University of Mysore, for their constant encouragement and valuable help in providing the required research facilities in the Department of Zoology, Manasagangotri, Mysore. I am also grateful and thank all the Teaching and Non-teaching staff of the Department of Zoology, for their help and needed support to carryout this research work. Further, I would like to acknowledge Mr. Gurumallesh, car driver and Mr. Panchalingachary, Retd., non-teaching member of the Department of Studies in Zoology, for their help in collecting samples.

I am highly grateful to late, Prof. M. Edward Gururaj., Prof. N.S. Gangadhara, Department of Studies in Zoology, and Prof. A.V. Champakamalini, Department of Zoology Yuvaraja's College, for their valuable suggestions and encouragements. Further, my sincere thanks to Prof. Veerabasappa Gowda and Prof. Karunakumar, Department of Studies in Biochemistry and Prof. G. Subramanya, Department of Studies in Sericulture for their help in allowing me to use spectrophotometer in their Departments.

I wish to acknowledge the help extended by my fellow lab mates, Mr. T. S. Harsha and Mr. Wadie Ahemed for their kind co-operation and constant encouragement in every step of my research work. In ardent sincerity, I would like to acknowledge my research colleagues, Mr. Vasudeva, S.P., Mr. Satishkumar, B.Y., Mr. Sachidanadamurthy, K.L., and also to Dr. Niranjan, M.H. Department of Botany, and Dr. Prasanna, Department of Geology for their constant help, encouragement, criticisms and valuable suggestions. I am thankful to all my friends and fellow research scholars in the Department of Zoology for their help. Further, my sincere gratitude is also due to Dr. Satish, Dr. Madesh, and Mrs. Tejaswini.
Department of Biochemistry, for their help in taking spectrophotometer readings, and also to Mr. Rajesh for his kind co-operation and help during the preparation of this thesis.

I am highly indebted to my Grand Mother late Smt. Chikkamadamma and my beloved parents, Shri. Mallaiah M., and Smt. S. M. Lakshmamma, my Maternal Uncles Shri. S.M. Savakaiah and S.M.Nanjundaswamy, my sisters, M. Sharada, M. Bhuvaneswari and brothers M. Mallikarjunaswamy and M. Somashekar without whom this work would not have been a reality. It was their faith and conviction that acted as a driving force behind this work.

My special thanks are due to Mr. Shivashankar, G., Dr. Basavaraju S., Dr. Sridhar H., Mr. Rachappaji S., Mr. Shivakumar K.S, Mr. Murthy and Murthy, and also to Mr. Narendranath, R.P. for their help, encouragement, and valuable suggestions.

I am grateful to Department of Science and Technology (DST), Government of India, New Delhi, for financial help through the major research project sanctioned to my guide (Prof. Sadanand M. Yamakanamardi). My thanks to Water Resource Development Organization (WRDO), Bangalore, Department of Irrigation and Statistics, Mysore and Mandya for the information provided.

Finally I thank all those who have helped me directly or indirectly during my entire study period as well as for the preparation of this thesis.

(M.Mahadevaswamy)
