ACKNOWLEDGEMENT

It is my great pleasure and privilege to acknowledge and express my deep sense of gratitude to my guide Dr. P. B. Mahapatra, Professor & Head, Department of Mechanical Engineering, Punjab Engineering College (Deemed University), Chandigarh. He has always been kind enough to spare his valuable time in giving the necessary guidance, well beyond the technicalities of this research work. He inspired and motivated me all the time to produce a valuable work, despite his busy schedule. His rich and varied experience as an academician immensely helped me in understanding this problem clearly. Without his constant involvement and inspiration, this work could not have been imagined and finished.

I express my sincere thanks to Prof. Sanjeev Kumar and Dr. S. K. Mangal, Dr. Alakesh Manna, Mechanical Engineering Department, Punjab Engineering College (Deemed University), Chandigarh for providing the assistance in my thesis.

I am grateful to all the faculty members of Mechanical Engineering department, who motivated and helped me in their own way.

I am also thankful to Mrs. Kamaljeet Kaur, Mr. Jaswinder Singh, Mr. RamNiranjan, Mr. Kirpal, and staff members of the Mechanical Engineering department, for their continuous help and support.

I am highly indebted to my wife, Sushma and son, Harsh, who always motivated me and happily sacrificed a lot in their personal lives for making this work a success. I don’t remember a single day when they didn’t force me to leave the home for pursuing my Ph. D. work.

Words are insufficient to express my profound sense of gratitude to my parents. Their encouragement and blessings gave me the moral strength throughout my career.

I am also thankful to all the people who directly or indirectly helped me in doing this work and above all THE ALMIGHTY.

(Deoraj Prajapati)
