The thesis on "Studies on the effect of different feeds on the quality and quantity of milk in dairy cattle" is the outcome of research work carried out by me at the National Dairy Research Institute, Karnal. These investigations were conducted under the able and expert guidance of Dr. V.D. Mudgal, Research Officer (Animal Nutrition), Division of Dairy Husbandry, National Dairy Research Institute, Karnal, to whom, I wish to express my sincere thanks and sense of gratitude.

I am grateful to Dr. P.G. Nair, Dairy Husbandry Officer and Dr. N.K. Dastur, Director of Dairy Research, for their interest shown in the study and facilities provided. I am also indebted to the Chairman and Members of the Research Co-ordinating Committee of this Institute, for the critical discussion and suggestions rendered during the conduct of this research programme.

The laying of the foundation and the completion of the series of investigation, the results of which are embodied in this thesis, were made possible by the whole-hearted co-operation of several of my colleagues, officers, attendants and labourers. I am grateful to all of them.

I am particularly thankful to Shri K.N.S. Sharma, for the suggestions and advice offered by him in the planning and analysis of the data.

The author is also grateful to the University Grants Commission for an award of a Research Fellowship, which enabled me to carry out these studies.

Karnal

(G. Morley Mohan Lal)
