ACKNOWLEDGEMENT

I take this opportunity to express my sincere thanks to Dr. S.P. Arora, Head, Division of Dairy Cattle Nutrition and Physiology, for his unstinted guidance. I am also thankful to him for promptly providing the necessary facilities for this study.

I am grateful to Dr. P.G. Nair, Principal, Dairy Science College, and a member of the Advisory Committee, for his help in academic matters and continuous encouragement during the period of study. I am also thankful to other members of the Advisory Committee, Dr. N.C. Ganguli, Head, Division of Dairy Chemistry, for his keen interest and encouragement, and Dr. V.D. Mudgal, Professor, Cattle Nutrition and Physiology, who helped me during this study as much as he helped me during my M.Sc. as the Principle Advisor. Unforgettable help of Dr. Mudgal as a hostelarden is also gratefully acknowledged.

I am thankful to Mr. V. Leela Prasad for constructive criticism; to Mr. K.N. B. Sharma for his help in statistical analysis; to Mr. Arun Srivastava for providing the small animals and to Mr. P.F. Atreja for miscellaneous help.

Above all, Dr. M.J. Chawla deserves a mention, without which the acknowledgement shall remain incomplete, for his enormous help in my academic life.

Finally, I thank United Nations Development Programme for providing fellowship during the tenure of the work.

Somervisubhash Nandana

(J.N. Sonwane)
