ACKNOWLEDGEMENTS....

And my success in my task can come only from Allah. In Him I trust, and to Him I turn (in repentance)

Al-Quran (Surah Hud, 11:88)

First and foremost, I am thankful to almighty Allah for what he has given to me.

I would like to thank my family who have sacrificed so much of all that was theirs to give me good education. I cannot even begin to thank them for all they have done for me.

I am also highly indebted to Late Hk. Abdul Hameed Sahib for his selfless efforts to establish this university. May his soul rest in paradise (Ameen!).

It is my pleasure to thank the people who made this thesis possible. First of all, I am deeply grateful to my supervisor Dr. Fakhrul Islam for introducing me in the scientific world of Neuroscience, and to let me understand that scientific work is enjoyable rather than a burden. Due to his inspiration, profound knowledge, and enthusiasm for research this thesis was first made possible. His patience, cool attitude, helpful guidance, and support in the process of this work will be in my mind forever. Words are insufficient to express his affectionate and co-operative nature coupled with deep knowledge of the subject, makes him a unique human being.

I would like to thanks my co-supervisor Dr. Mohd Saeed Siddiqui, for his patience and steadfast encouragement to complete this study.

My whole hearted thanks to Prof. S. Raisuddin, head of the Department of Medical Elementology and Toxicology for his valuable suggestions, constructive criticism and endless support, and inspiration that have pushed me forward for the doctorate program in the University and for supporting this thesis work and for the last five years working at his department. I was learning far more than neurobiology at that time.

I owe a special debt of gratitude to my teachers Prof. E. A. Khan, Prof. S. Raisuddin (HOD), Dr. Sarwat Sultana, Dr. Mohd Saeed Siddiqui, Dr. H. A. Khan and Dr. Subel Parvez, for their moral support, priceless suggestion, inspiration and guidance throughout the study period.

I would like to express my sincere gratitude and appreciation to Dr. Subel Parvez, neurotoxicology lab incharge, for their valuable knowledge, precious advice and guidance during my tenure of work.

My sincere thanks goes to Prof. M. Z. Abdin, Dean Faculty of science for his constant encouragement, moral support and providing necessary facilities to effectively carry out this work.

I feel pleasure to express my sincere thanks to Vice Chancellor Dr. G. N. Qazi for taking keen interest in ongoing research and developmental programs in the University.
Messers F.A. Zaidi, Junaid, Irshad and S.D. Sharma are highly acknowledged for their technical assistance and versatile expertise they shared with me during the study. The same way I should never forget messers Razī, Rabman, Ekhlaq, Ebtesham, and Idris, the attendants of the department, forever ready help and cooperation. The staff of animal house Prof. Shakir Ali, Dr. Tiwari, Messers Tariqat, Ibrahim and Sant Raj deserve a special praise for providing the animals and taking their care. It is really due to their help my experiments were possible.

I also thank the library staff Mrs. Zia Fatima, Mr. Shamim for their help and cooperation for issuing books during my Ph.D programme.

The special thank for skilful technical assistant of our laboratory, from time to time, Messers Mr. Abdul Fitr, and Idris whose had done, what they ought to, in a spur and the desired way.

I would like to acknowledge the company, cooperation and help of my labmates during the tenure of the study. My senior labmates: Drs. M.B.Khan, Moshahid Khan, Gaurana Khawaja, Ajmal Ahmad, S. Shadab Raza, Hayat Javed, Andaleeb Khan, Kumar Vaibhave Rizwana Tabassum and my juniors Ejaz Ahmad for their invaluable support and selfless help. They have been the driven force behind my efforts.

I would like to acknowledge the company, cooperation and help of my friends Abu Hasnath, Rashid Ali, Ishitay, Zabreer, Tafazzul, Mushtaq, Rashik, Akhtar, Rabbani, Mobin, Pervaz, Islamuddin Riyaz, Atbar, Arjumand, Tanveer, Farha, Masood Shah, Waseem Ahmad, Noman, Mohammad Salman, Mobwood, Imran, Owais, Shaklain, Yaqoob, for their co-operation and providing congenial atmosphere during the course. My heartiest wishes are always with them for bright and successful future in every aspect of life (Ameen).

I would like to acknowledge the valuable help and cooperation of my senior colleagues and friends especially, Drs. Moshahid Khan, Syed Shadab Raza, and Sadiq Umar. I would never forget their cordial cooperation during many occasional light and dark moments of research that I shared with them.

I express my thankfulness to my seniors and colleagues, Qaiyoom, Rizwan, Rashid Khan, Altaf Khan, Minbaz Ahmad Khan, Jamil Zargan, Mather, Tabir, Muneeb, Rehan, Firaz, and the younger ones Waseem, Meraj, Nemat, Somaira, Sana, Saba, Sbaista, Neha, and Nandani for their suggestions and valuable cooperation during the course of study.

Most importantly, I would like to thank and feel short of words to express my sincere thanks to my family for the care, sacrifice, support, encouragement and affection and who’s always inspired me by their breathless efforts. I felt highly pledged to get the parents who were always a constant source of inspiration for me: “Our future depends on what is inside it” is what my father wrote to the schoolmaster who mistakenly caned me on the head. This work should serve as a small token for his (continued) belief in my head. Their continuous endurance and support didn’t let me down even in the difficult phases of my research work. I am highly thankful to god for gifting me the most caring, loving and sweetest parents of the world.
I can’t forget to put my word of special thanks for my wife who always provides a band of support and is continuous source of encouragement for me.

I also acknowledge the kind of support provided by my sisters and brothers who always adore me and gave me strength of confidence. I am equally thankful to my sweetest nephew Huzaifa who acts as a symbol of complete confidence in me.

I would like to express my humble gratitude to all those whose name has not been mentioned here, but without whose support I would definitely not be able to finish this work.

Finally, I would like to acknowledge all the experimental animals that silently sacrificed their lives for my experimental studies.

(Mohammad Ashfaq)
