ACKNOWLEDGEMENTS

It gives me great pleasure to submit my thesis titled “STUDY OF KNOWLEDGE SOURCES ATTRIBUTING TO A SOFTWARE PROJECT’S SUCCESS-WITH SPECIAL REFERENCE TO SELECTED COMPANIES IN IT INDUSTRY” to the University of Pune.

I owe deepest gratitude to my guide Dr. Rajkumar R. Hirwani for his continuous support throughout the research work. I was very fortunate to have him as my guide who guided me continuously in all stages of this research. He was always open to new ideas and gave me freedom to explore on my own and supported me continuously. It was very challenging for me to make a transition from an IT Industry professional’s way of thinking to a researcher’s way of thinking. Dr. Hirwani helped me immensely in this crucial and difficult change by not only guiding me but also encouraging me continuously.

I will like to thank the Head of the Department and all the staff members of my research center ‘Department of Management Science (PUMBA)’ for their valuable support. Special thanks to Dr. Surbhi Jain of PUMBA. During my entire research she not only guided me in research related aspects but also helped me in completing all administrative related formalities.

Avinash Marathe is a renowned IT expert with more than 40 years of IT Industry experience. It was a privilege to have him as domain expert for my entire research. I am very grateful to him for the valuable insights, very rich practical advice and continuous valuable feedback during entire research.

I sincerely appreciate and thank Dr. Vaishali Mardhekar a very expert statistician and researcher. She gave me very valuable advice about statistical analysis
techniques and helped me doing data analysis. Her unique combination of researcher and statistician helped me to understand a lot of nuances of research and data analysis.

My sincere thanks to my best friends and IT Industry experts Sumedh Karandikar, Sameer Mardhekar and Shailesh Kolhatkar. Without their continuous support, encouragement and in-depth IT Industry knowledge it would have been impossible for me to complete this research.

I am very thankful to all my survey respondents, interview participants. In spite of very busy schedule they not only participated in the survey and interviews, but also gave their valuable feedback for the research.

I also thank Swati Deodhar and Shirish Deodhar of Sapience Analytics for giving me flexibility, time and continuous encouragement during my entire research.

I am really lucky to be blessed by wonderful family and friends. They supported me during thick and thin of this entire journey.
