# Table of Contents

---

## Chapter 1

1. Introduction
   1.1 Surfactants 
   1.2 Classification of Surfactant
   1.3 Micellization 
   1.4 Counterion Variation 
   1.5 Solvent Effect on the Aggregation of Surfactant 
   1.6 Thermodynamics of Micellization 
   1.7 Dye and its Self Aggregation 
   1.8 Dye Surfactant Interactions 
   1.9 The Molecular Exciton Model of Dye Aggregation 
   1.10 Scope and Objective of the Present Study 

## Chapter 2

2. Experimental
   2.1 Materials
   2.2 Preparation of the Solutions
   2.3 Experimental Techniques

## Chapter 3

3. Micellization of Ionic Surfactants in Mixed Aqueous Organic Solvent Media
   3.1 Introduction
   3.2 Experimental
   3.3 Results and Discussion

Pages
Chapter 4  Self-Aggregation of Pinacyanol Dye in Aqueous and Aqueous-Organic Solvent Mixed Media and in Presence of Polymer

4.1  Introduction  64
4.2  Experimental  66
4.3  Results and Discussion  68

Reference  83
Supplementary Data  84

Chapter 5  Dye Surfactant Interaction between Pinacyanol Chloride and anionic surfactant, Sodium Dodecyl Benzene Sulphonate (SDBS) in Mixed Aqueous Organic Solvent Media

5.1  Introduction  93
5.2  Experimental  94
5.3  Results and Discussion  95

Reference  104
Supplementary Data  105

Chapter 6  Iodine-Iodide Equilibrium in Aqueous and Mixed Aqueous Organic Solvent Media with or without Surfactant

6.1  Introduction  107
6.2  Experimental  109
6.3  Results and Discussion  110

Reference  128
Supplementary Data  129

Chapter 7  Conclusion  133
