ACKNOWLEDGEMENT

I take this opportunity to remember and thank each one of them, who have supported in my beginning and first journey of research,

First and foremost my sincere and heartfelt thanks to Dr. H. Rajashekar, Professor, Department of studies in Commerce, University of Mysore, Manasagangotri for accepting me as a full time research scholar. It is great pleasure to work under him as a student and as a fellow research scholar, his timely guidelines has made me to realize the needful thoughts. His professionalism in research work has taken me to meet the essential requirements of the research.

The second thing which comes to my mind while remembering to thank is Mysore University and University Grants Commission. These two institutions have given me a big opportunity to enter into the field of learning and research for showing the road map of success now and in future endeavors.

I am thankful to Dr. Nagendra Babu K. Chairman and Associate Professor, DOS in Commerce, University of Mysore for his insightful corrections. I express gratefulness to Prof. G. Kotreshwar, Prof. Suresh B H, Dr B. Nagaraju, Dr N. Nagaraja and Dr. M L Ashoka for their valuable suggestions and encouragement.

The research friends, a big team of junior research fellows and other scholars all together had created the wonderful platform for exchange of ideas and sharing the knowledge by discussions, which is never ending. We all contribute each other in our works. The lots of thanks to them and wish them all success in their research work too.

The Department of Commerce is the biggest strength in my work, the professors, office staff, guest faculties, students of M.Com whom I used to take the tutorial classes. The friendly gesture and support from all is the ultimate gift. Thanks to all.

Of course it is meaningless if I don’t remember the pains taken in the course of research, but all pain went in wind with the strong support from my family. My parents Smt Lakshmi and Sri C. Swamy being have put the strong base and pillars in my education and the roof was constructed by my lovely husband Aravinda Narayana Swamy by his love and care with an intense respect for knowledge and education. The
quality construction of the research is only possible by such strengths, which is god’s grace and wishes too. My gratitude and salute to them.

With all the above, I’m indebted to remember the employees working in different sectors of Karnataka State Public Enterprises for spending their valuable time in sharing their experience and providing the required data being unbiased. My wishes and salute to all.

Its pleasure to remember research journey through train journey, my train friends. The valuable time spend along the journey of research while travelling in train from Mysore to Bangalore and Bangalore to Mysore. The helping hands at the time of difficulties in the journey are my train friends. We shared our life experience of happiness, sorrows, fun and entertainment which made me not to realize the difficulty of the journey and which made me to get good refreshment to end and begin the day with lots of energy.

In particular, I must remember few names Dr. Suresh Poojari and Smt. Sucharita Suresh Poojari, the couple from Mangalore, being academically sound about the statistics and data analysis, who helped in verifying, and suggesting about the data analysis part of my research work. Their friendly approach and their timely suggestions have made me to incorporate the necessary changes in technical part of the thesis for achieving the quality work. I thank Mr. M. Naveen Kumar from MNK Solutions Saraswathipuram for giving best outlook for the thesis.

Nothing is possible without god’s grace. I believe being optimistic about spirituality. My gurus in heart, their blessings, feel me to get courage and confidence, my humble pranams at their feet for showered blessings.
