| <b>4. DATA REDUCTION, ANALYSIS AND RESULTS</b>                            |    |
| 4.1 A brief discussion on IRAF  | 39 |
| 4.2 Calibration of CCD images   | 40 |
| 4.3 CCD aperture photometry to obtain instrumental magnitudes             | 41 |
| 4.4 Normalization of observed magnitude to one sec exposure time          | 43 |
| 4.5 Air mass correction   | 44 |
| 4.6 Conversion to standard magnitude scale                                | 46 |
| 4.7 Estimation of extinction  | 47 |
| 4.8 Comparison with the polarimetric data                                 | 49 |
| <b>5. ERROR ANALYSIS</b>  |    |
| 5.1 Error and its types   | 74 |
| 5.2 Propagation of errors   | 75 |
| 5.2 Different sources of errors and their propagation in the present case | 76 |
| <b>6. DISCUSSION AND CONCLUSIONS</b>                                      | 79 |
