## CONTENTS

1.9.4 Surface reaction of catalysed composite propellant 20

1.10 **General aspects of nano materials** 20

1.11 **Recent development in ballistic modifiers based on transition metals**

1.11.1 Transition metal complexes as ballistic modifier in composite propellant 22

1.11.2 Nano transition metal particles as ballistic modifier in composite propellants 23

1.11.3 Nano metal oxides and mixed transition metal oxides as ballistic modifier in composite propellant 24

1.11.4 Nano mixed transition metal hydroxide as ballistic modifier in composite propellant 26

1.11.5 Application of nano iron oxide as ballistic modifiers 26

1.11.6 Application of nano copper oxide as ballistic modifiers 27

1.11.7 Application of nano cobalt oxide as ballistic modifiers 27

1.11.8 Application of nano manganese oxide as ballistic modifiers 27

1.11.9 Application of nano transition metal oxides (TMOs) as ballistic modifiers in HTPB/AP/Al based composition 28

1.12 **Limitation of the earlier studies and objectives of thesis** 29

1.13 **The scope of present research work** 29

1.14 **References** 31

---

### Chapter II Experimental

2.1 **Raw materials** 43

2.1.1 Liquid raw materials 43

2.1.2 Solid ingredients 46

2.1.3 Other chemicals used during present research 51
work

2.2 Equipment

2.2.1 Rotating Vacuum Dryer  52
2.2.2 Air Classifier Mill (ACM)  52
2.2.3 Vertical Planetary Mixture  53
2.2.4 Casting Assembly  54
2.2.5 Water Jacketed Oven  54
2.2.6 Hot Air Oven  54

2.3 Method

2.3.1 Preparation of nano Fe$_3$O$_4$  54
2.3.2 Incorporation of burning rate modifiers in composite propellant formulation  55
2.3.3 Casting and curing  57
2.3.4 Extraction of propellant grain  57

2.4 Methodology

2.4.1 Determination of moisture content  57
2.4.2 Determination of hydroxyl value of HTPB  58
2.4.3 Determination of particle size and distribution  59
2.4.4 Determination of crystal phase of material and crystallite size  60
2.4.5 Determination of particle size by NANOPH0X  60
2.4.6 Determination of surface morphology by scanning electron microscopy  60
2.4.7 Determination of particle size by transmission electron microscopy  61
2.4.8 Determination of specific surface area  61
2.4.9 Thermal analysis  61
2.4.10 Determination of purity of TMOs by inductively coupled plasma-atomic emission spectroscopy  62
2.4.11 Determination of volatile matter  62
2.4.12 Determination of viscosity  63
2.4.13 Determination of number average molecular weight
Chapter III Results and Discussion

3.1 Characterization of transition metal oxides
  3.1.1 Determination of purity of transition metal oxides
  3.1.2 Determination of density of transition metal oxides
  3.1.3 Determination of particle size of nano sized TMOs by NANOPHOX particle size analyser
  3.1.4 Determination of particle size of micron sized TMOs by Cilas particle size analyser
  3.1.5 Determination of specific surface area
  3.1.6 Determination of particle size and surface morphology of TMOs
  3.1.7 Powder X-ray diffraction

3.2 Effect of TMOs on thermal decomposition of ammonium perchlorate
  3.2.1 Differential scanning calorimeter
  3.2.2 Thermo gravimetric analysis

3.3 Effect of TMOs on thermal decomposition of Binder (Gum Stock)

3.4 Effect of nano and micron sized TMOs on HTPB/AP/Al based composite propellant formulation
  3.4.1 The formulation details of composite propellant

3.5 Effect of nano and micron sized copper (II) oxide on HTPB/AP/Al based composite propellant formulation
  3.5.1 Effect of nano CuO and micron CuO on viscosity
3.5.2 Effect of nano CuO and micron CuO on mechanical properties

3.5.3 Effect of nano CuO and micron CuO on thermal properties

3.5.4 Effect of nano CuO and micron CuO on ballistic properties

3.6 Effect of nano and micron sized cobalt (II, III) oxide on HTPB/AP/Al based composite propellant formulation

3.6.1 Effect of nano and micron sized cobalt (II, III) oxide on viscosity build up

3.6.2 Effect of nano and micron sized cobalt (II, III) oxide on mechanical properties

3.6.3 Effect of nano and micron sized cobalt (II, III) oxide on thermal properties

3.6.4 Effect of nano and micron sized cobalt (II, III) oxide on ballistic properties

3.7 Effect of nano and micron sized manganese (IV) oxide on HTPB/AP/Al based composite propellant formulation

3.7.1 Effect of nano and micron sized manganese (IV) oxide on viscosity build up

3.7.2 Effect of nano and micron sized manganese (IV) oxide on mechanical properties

3.7.3 Effect of nano and micron sized manganese (IV) oxide on thermal properties

3.7.4 Effect of nano and micron sized manganese (IV) oxide on ballistic properties

3.8 Effect of nano and micron sized chromium (III) oxide on HTPB/AP/Al based composite propellant formulation

3.8.1 Effect of nano and micron sized chromium (III) oxide on viscosity build up
CONTENTS

oxide on viscosity build up
3.8.2 Effect of nano and micron sized chromium (III) oxide on mechanical properties 140
3.8.3 Effect of nano and micron sized chromium (III) oxide on thermal properties 141
3.8.4 Effect of nano and micron sized chromium (III) oxide on ballistic properties 146

3.9 Effect of nano iron (II, III) oxide and nano iron (III) oxide on HTPB/AP/Al based composite propellant formulation
3.9.1 Effect of nano iron (II, III) oxide and nano iron (III) oxide on viscosity build up 150
3.9.2 Effect of nano iron (II, III) oxide and nano iron (III) oxide on mechanical properties 151
3.9.3 Effect of nano iron (II, III) oxide and nano iron (III) oxide on thermal properties 152
3.9.4 Effect of nano iron (II, III) oxide and nano iron (III) oxide on ballistic properties 157

3.10 Comparative performance of studied nano TMOs on desired ballistic properties of composite propellant formulations 160

3.11 References 164

Chapter IV Summary
4.1 Different approaches to achieve higher burning rate 168
4.2 Preparation and characterisation of nano Fe$_3$O$_4$ 169
4.3 Characterization of other TMOs 170
4.4 Effect of TMOs on thermal decomposition temperature of ammonium perchlorate 171
4.5 Effect of TMOs on thermal decomposition of binder 173
4.6 Effect of TMOs on HTPB/AP/Al based composite propellant formulation 174
4.6.1 Effect of TMOs on viscosity build up 174
