List of Figures

Fig. 1.1: World tea production (million kgs) in 2011 2
Fig. 1.2: World tea export (million kgs) in 2011 2
Fig. 2.1: The climatic variables of the study area 19
Fig. 2.2: Population structure of Cachar, Hailakandi and Karimganj districts (2011 census) 19
Fig. 2.3: Map showing study area 20
Fig. 2.4: Boundary map 21
Fig. 2.5: Drainage map 22
Fig. 2.6: Soil map 23
Fig. 3.1: Flowchart of the methodology of Landuse/landcover classification 39
Fig. 3.2: Spectral response plot of mean digital no. (DN) value of Forest, Tea and other plantation of AWiFS data 41
Fig. 3.3: Spectral response plot of mean digital no. (DN) value of Agriculture, wasteland and water of AWiFS data 41
Fig. 3.4: FCC image of Barak valley 43
Fig. 3.5: Landuse/landcover map of Barak valley 44
Fig. 3.6: Distribution of Landuse/Landcover classes 45
Fig. 4.1: Elevation map of study area 59
Fig. 4.2: Slope map of the study area 60
Fig. 4.3: Aspect of the study area 61
Fig. 4.4: Preliminary map of Distribution of Camelia sinensis in Northeast India 64
Fig. 4.5: Potential habitat distribution of the species in Barak valley, Assam 65
Fig. 4.6: Area under different suitability grades for the optimal average model 66
Fig. 4.7: Receiver operating characteristic (ROC) curve of training and test data 68
Fig. 4.8: Results of jackknife evaluations of relative importance of predictor variables for *Camellia sinensis* MaxEnt model 69
Fig. 5a.1: Flowchart of LULC change analysis 81
Fig. 5a.2: Spectral reflectance of landcover classes of LISS III 2011 image 84
Fig. 5a.3: Spectral reflectance of landcover classes of LISS III 2007 image 84
Fig. 5a.4: FCC of LISS III showing the landuse classes 86
Fig. 5a.5: FCC LISS III image showing (a). Healthy tea patches and (b). Unhealthy tea patches 87
Fig. 5a.6: Landuse/landcover map of Doloo Tea Estate of 2007 89
Fig 5a.7: Landuse/landcover map of Doloo Estate of 2011 90
Fig. 5a.8: The percentage of different landuse categories of Doloo tea estate of 2007 91
Fig. 5a.9: Percentage of different landuse categories of Doloo tea estate (2011) 92
Fig. 5a.10: Area under different landuse categories of tea Doloo estate in 2007 and 2011 93
Fig. 5a.11: NDVI map of Doloo Tea Estate of 2007 96
Fig. 5a.12: NDVI map of Doloo Tea Estate of 2011 97
Fig. 5a.13: The percentage of different landuse categories of Doloo tea estate from NDVI map 2007 98
Fig. 5a.14: Area of different landuse categories of Doloo tea estate from NDVI map 2011 99
Fig. 5a.15: Area under different landuse categories of tea Doloo estate from NDVI map of 2007 and 2011

Fig. 5b.1: Map showing marginal land in 2007 LISS III

Fig. 5b.1: Map showing marginal land in 2007 LISS III

Fig. 6.1: Map showing sampled tea estates of Barak Valley

Fig. 6.2: Densities of shade trees of Tea Estates of Barak Valley

Fig. 6.3: Basal area of shade trees of Tea Estates of Barak Valley

Fig. 6.4: Density (ind ha⁻¹) of tea gardens of Cachar district

Fig. 6.5: Basal area (m² ha⁻¹) of tea gardens of Cachar district

Fig. 6.6: IVI values of tea gardens of Cachar district

Fig. 6.7: Girth class distribution of Cachar district

Fig. 6.8: Density (ind ha⁻¹) of tea gardens of Hailakandi district

Fig. 6.9: Basal area (m² ha⁻¹) of tea gardens of Hailakandi district

Fig. 6.10: IVI values of tea gardens of Hailakandi district

Fig. 6.11: Girth class distribution of Hailakandi district

Fig. 6.12: Density (ind ha⁻¹) of tea gardens of Karimganj district

Fig. 6.13: Basal area (m² ha⁻¹) of tea gardens of Karimganj district

Fig. 6.14: IVI values of tea gardens of Karimganj district

Fig. 6.15: Girth class distribution of Karimganj district
