ACKNOWLEDGEMENT

The research work embodied in this thesis has been carried out by me in the Department of Chemistry (Organic Chemistry Laboratories) Karnataka University, Dharwar, under the direction of Dr. S. Rajagopal, D.Sc., F.R.I.C. (Lond.), and the pharmacological testing under the supervision of Prof. M. Sirsi, Pharmacology Laboratory, Indian Institute of Science, Bangalore. The extent of information derived from the existing literature has been indicated in the body of the thesis at appropriate places giving the source of information. The work is original and has not been submitted in part or full for any of the Diploma or Degree in this or any other University.

I wish to express my thanks to Dr. S. Rajagopal for his guidance. I also thank Prof. S. Siddappa, M.Sc., Ph.D. (Lond.), D.I.C., Head, Department of Chemistry, Karnataka University, Dharwar, for his interest and encouragement and for providing me laboratory facilities.

I am thankful to Prof. M. Sirsi, for his help in testing and evaluating the anticoagulant activity of the compounds. My thanks are also due to Shri V. A. Desai, of
the Department of Chemistry, for elemental analysis and to M/s Sadtler Research Laboratories, Inc., Philadelphia, Pa., U.S.A., for some of the infrared spectra recorded in this thesis.

I also thank the Council of Scientific and Industrial Research and the University Grants Commission, for the award of Junior Research Fellowship.
