Table of Contents

1. INTRODUCTION ............................................. 1 – 6

2. REVIEW OF LITERATURE .................................. 7 – 46
   2.1 Constituents of betel quid .......................... 7
   2.2 Metabolism of areca nut and its role in carcinogenesis 14
   2.3 Betel quid chewing habit and human health ......... 22
   2.4 Smokeless tobacco chewing habit and human health 24
   2.5 Studies of cancer in experimental animals .......... 31
   2.6 Studies of cancer in human .......................... 34
   2.7 Betel quid and areca nut chewing habit and related effects 37
      2.7.1 Genotoxicity and mutagenicity ............... 37
      2.7.2 Oncogenes and tumor-suppressor genes ...... 40
   2.8 Reproductive and fertility related effects ........ 43

3. MATERIAL AND METHODS ................................. 47 – 80
   3.1 Experimental Animal .................................. 47
   3.2 Experimental Chemicals .............................. 50
      3.2.1 Laboratory reagents .......................... 50
      3.2.2 Alkaloid, dose and treatment ................. 50
         Arecoline ............................................ 50
      3.2.3 Metabolites, dose and treatment ............... 53
         Arecaidine .......................................... 53
         Arecoline N-oxide .................................. 53
         N-methyl Nipecotic acid ........................... 53
      3.2.4 Extracts, dose and treatment .................... 56
         Areca nut extract .................................. 56
         Sadagura extract .................................. 56
         Areca nut with sadagura extract .......... ....... 56
   3.3 Experimental Protocols ............................... 60
      3.3.1 Chromosome aberration assay ................ 61
      3.3.2 Micronucleus assay ............................ 62
      3.3.3 Sperm head abnormality assay ............... 67
      3.3.4 Total sperm count ............................. 68
      3.3.5 Lipid peroxidation assay .................... 69
      3.3.6 Studies of survival time of DLA bearing mice 72
      3.3.7 Analysis of body weight of DLA bearing mice 74
      3.3.8 Packed cell volume (PCV) of DLA bearing mice 75
   3.4 Statistical Analysis .................................. 76
Contents  

3.5 Photomicrographs  
4. EXPERIMENTAL RESULTS  
4.1 Genotoxicity of arecoline  
4.1.1 Chromosome aberration assay  
4.1.2 Micronucleus assay  
4.1.3 Sperm head abnormality assay and total sperm count  
4.2 Genotoxicity of arecaidine  
4.2.1 Chromosome aberration assay  
4.2.2 Micronucleus assay  
4.2.3 Sperm head abnormality assay and total sperm count  
4.3 Genotoxicity of arecoline N-oxide  
4.3.1 Chromosome aberration assay  
4.3.2 Micronucleus assay  
4.3.3 Sperm head abnormality assay and total sperm count  
4.4 Genotoxicity of N-methyl nipecotic acid  
4.4.1 Chromosome aberration assay  
4.4.2 Micronucleus assay  
4.4.3 Sperm head abnormality assay and total sperm count  
4.5 Comparison of genotoxicity of arecoline and its metabolites  
4.5.1 Chromosome aberration assay  
4.5.2 Micronucleus assay  
4.5.3 Sperm head abnormality assay and total sperm count  
4.6 Genotoxicity of areca nut extract  
4.6.1 Chromosome aberration assay  
4.6.2 Micronucleus assay  
4.6.3 Sperm head abnormality assay and total sperm count  
4.7 Genotoxicity of sadagura extract  
4.7.1 Chromosome aberration assay  
4.7.2 Micronucleus assay  
4.7.3 Sperm head abnormality assay and total sperm count  
4.8 Genotoxicity of areca nut with sadagura extract  
4.8.1 Chromosome aberration assay  
4.8.2 Micronucleus assay  
4.8.3 Sperm head abnormality assay and total sperm count  
4.9 Comparison of genotoxicity of areca nut and sadagura extracts  
4.9.1 Chromosome aberration assay  
4.9.2 Micronucleus assay  
4.9.3 Sperm head abnormality assay and total sperm count
4.10 Oxidative stress measured as lipid peroxidation

4.10.1 Induction of lipid peroxidation by arecoline 155
4.10.2 Induction of lipid peroxidation by arecaidine 159
4.10.3 Induction of lipid peroxidation by arecoline N-oxide 161
4.10.4 Induction of lipid peroxidation by N-methyl nipecotic acid 163
4.10.5 Vitamin C as an antioxidant against arecoline, arecaidine, arecoline N-oxide and N-methyl nipecotic acid induced lipid peroxidation 166
4.10.6 Induction of lipid peroxidation by areca nut extract 167
4.10.7 Induction of lipid peroxidation by sadagura extract 168
4.10.8 Induction of lipid peroxidation by areca nut with sadagura Extract 170
4.10.9 Vitamin C as an antioxidant against areca nut extract, sadagura extract and areca nut with sadagura extract induced lipid peroxidation 172

4.11 Effect of areca nut extract, sadagura extract and areca nut with sadagura extract on Dalton’s lymphoma bearing mice

4.11.1 Mean survival time 173
4.11.2 Body weight analysis 176
4.11.3 Packed cell volume 178

5. DISCUSSION 181 – 207

5.1 Genotoxicity of arecoline and its metabolites 181
5.2 Genotoxicity of areca nut and sadagura extracts 187
5.3 Lipid peroxidation studies of arecoline and its metabolites 191
5.4 Lipid peroxidation studies of areca nut and sadagura extracts 194
5.5 Vitamin C on arecoline and its metabolites induced lipid peroxidation 197
5.6 Vitamin C on areca nut and sadagura extracts induced lipid peroxidation 201
5.7 Tumorigenicity of areca nut and sadagura extracts 205

6. SUMMARY 208 – 217

BIBLIOGRAPHY 218 – 247
ABBREVIATIONS 248 – 249
LIST OF PUBLICATION AND PARTICIPATIONS 250 – 252
