ACKNOWLEDGEMENTS

It is a great privilege to write a few lines on this page to express my sincere gratitude to the persons from whom I received inspiration, timely guidance, constant help and moral support, that kept me motivated to carry out the research work. I would first of all like to express my acknowledgments to the people who made this work possible. It include my supervisors, Dr. Z. V. Lakaparampil, Associate Director, Centre for Development of Advanced Computing, Thiruvananthapuram, Kerala, and Dr. S. Ushakumari, Professor, Department of Electrical Engineering, College of Engineering Trivandrum.

I record my profound sense of gratitude to my guide, Dr. Z. V. Lakaparampil, who has taken wholehearted and sincere interest from selection of the area of research till the completion of the thesis, and for the valuable suggestions and support received throughout the period of the work. His precious advice and numerous discussions enhanced my knowledge and scientific inspiration. I truly appreciate and value his esteemed guidance and encouragement from the beginning to the end of the thesis and his knowledge at the time of crisis would be remembered lifelong. Without his experience and deep knowledge of power electronics, drives and control, this work would not have been completed.

Thanks are due to my guide, Dr. S. Ushakumari, on whom I was dependent for the day-to-day progress of the work and related official matters. Without her guidance and deep knowledge of control system, this work would not have been possible. She gave me many insightful comments and constructive suggestions in review of the thesis. The patience, sincere interest, directions and caring support received from her throughout the course and in the preparation of the thesis are gratefully acknowledged.
I shall always remain grateful to the family members of my guides, for sparing their valuable time to allow discussions frequently.

I am thankful to Prof. S. Lyla, Head of the Department of Electrical Engineering, College of Engineering Trivandrum, for all help rendered by her. I like to remember all kind of encouragement and help given by Dr. S. Sheela, Principal, College of Engineering Trivandrum, during the period of the work.

In resolving many doubts, the help received from Dr. Dinesh Gopinath, Associate Professor, Department of Electrical Engineering, Dr. Anil Lal S. Professor, Department of Mechanical Engineering, Dr. Vrinda V. Nair, Professor, Department of Electronics and Communication Engineering, Dr. Ruby Abraham, Professor, Department of Civil Engineering, College of Engineering Trivandrum, are thankfully acknowledged. The creative support given by Dr. Jisha V. R., Associate Professor, Department of Electrical Engineering, College of Engineering Trivandrum, is remembered with thanks.

I use this occasion to express my sincere gratitude to the members of CDAC-PEG group, Chief Librarian of College of Engineering Trivandrum and the library staff in availing the library facilities and for the valuable information provided by them. Grateful thanks are due to all the concerned persons/organizations.

I have to thank all my colleagues and friends of the Department of Electrical Engineering at College of Engineering Trivandrum for their encouragement and support during the period of the work. All kinds of help given by the supporting staff of the Electrical Engineering Department are also gratefully acknowledged.

I could not fail to remember the support given by Mr. V. S. Suresh Babu and his family during the course of this work. My parents and parents-in-law who taught me the value of hard work from their own example, were always keen in carrying on with the research work diligently and provided necessary help with love and patience. I wishes to thank my son Chinmay Krishna S. for his lenience in allowing me to carry out the works, conceding his personal interests. I am at a loss to get words to express my gratitude for the continuous encouragement and support.
received from my beloved husband Mr. S. Saju, throughout the research work and in documenting the same. Without his co-operation this work would not have been in its present form.

I acknowledge support from SPEED-IT Research Fellowship from IT Department of the Government of Kerala. I am grateful to CET administration for providing a very good working environment overall. I would like to thank all whose direct and indirect supports helped me in completing my thesis in time.

Above all, I thank GOD, THE ALMIGHTY for giving me health and strength to complete the thesis.

Nisha G. K.
