ACKNOWLEDGEMENT

The writing of this thesis has been one of the most significant academic challenges that I ever had to face. Without the support, patience and guidance of the following people, this study would not have been completed. It is to them that I owe my deepest gratitude.

At the very outset, I would like to express my sincere gratitude to my supervisor Prof. (Dr.) Sankar Kumar Ghosh for his continuous support, patience, motivation, criticism, enthusiasm and immense knowledge in my PhD study and research. His guidance helped me in all the time of my research and writing of this thesis. I could not have imagined having a better advisor and mentor for my PhD study.

I would like to convey my profound gratitude to Dr. Ravi Kannan, Director of Cachar Cancer Hospital and Research Centre, for providing the bio-specimens without which this study would not have been completed. Many thanks too to the other members of Cachar Cancer Hospital and Research Centre for their co-operation and I also owe many thanks to the head and neck cancer patients, who have taught me love and respect for health and human life.

I am also thankful to the Head of Department of Biotechnology, all the faculty members, technical and official staffs. They have always extended their helping hands whenever needed.

I would like to convey my profound gratitude to the Hon’ble Vice Chancellor and Dean, School of Life Science and Bioinformatics for giving me the opportunity to be a part of the research world in Assam University.

I am grateful to Dr. Sumita Duttagupta for her help in the histopathological study in this research and Dr. Biswadeep Choudhury for his suggestions in the prevalence study of head and neck cancer. I am also thankful to Dr. Probal Ranjan Ghosh, West Bengal University of Animal and Fishery Science, Kolkata for his help and suggestions throughout my research work.

The kind cooperation, assistance and help from my dear lab mates of Molecular Medicine and Genomic labs. are gratefully acknowledged – especially Monika, Pradosh, Jagadish, Miranda, Ruhina, Fazlur, Bishal, Anil, Javed, Mohua and my most juniors Sharbadeb and Himangshu.

I sincerely thank to the Department of Biotechnology, Government of India, for providing financial assistance in the form of Research Fellow of the project titled “Hospital Based Patient Care on Cancer at Barak Valley of Northeast India” which buttressed me to perform my work comfortably.

On a special note, my parents and my elder brother, Arijit, has rendered enormous support and constant encouragement to me throughout this long journey. Without their care, love and blessings, I could have never completed my work.

Last but not the least, I thank god, the Almighty for the wisdom and perseverance that he has been bestowing upon me during the research period, and indeed, throughout my life. I am ever grateful to God, for providing me this opportunity and granting me the capability to proceed successfully.

(Rosy Mondal)
