ACKNOWLEDGEMENTS

I gratefully acknowledge my deep sense of gratitude and appreciation to Dr. E.S. Jayadevappa, M.Sc. (British Columbia), Ph.D. (Kansas, USA) for his keen interest, encouragement and valuable guidance throughout the course of this work and discussions presented in this thesis.

I am highly indebted to Dr. V.V. Badiger, Professor of Organic Chemistry, Department of Chemistry, Karnataka University, Dharwad for his keen interest and valuable suggestions during the synthetic part of the present work. I am thankful to Dr. T.M. Aminabhavi, Research Associate, Institute of Colloid and Surface Science, Clarkson College Potsdam, New York for providing the computer programme and for the computation of some of the results reported in the thesis. Thanks are also due to Dr. S.P. Hiremath, Head of the Department of Chemistry, Gulbarga University for supplying the IR spectra of some of the compounds reported.

I am also thankful to the authorities of the Karnataka University, Dharwad for providing the laboratory facilities to carry out the present investigations in the Department of Chemistry.

Thanks are also due to the M.Sc. Final year Physical Chemistry students, for their assistance during the preparation of the present thesis.

Finally, I wish to extend my sincere thanks to all my well wishers, colleagues and friends who have helped me in one way or another.

DHARWAD
