ACKNOWLEDGEMENTS

I would like to acknowledge my deep gratitude to Dr. H.S. Gopalakrishna, Reader, Department of Mathematics, Karnataka University, Dharwar for his guidance, persistent encouragement and wise counsel throughout the preparation of this work. It is a matter of great pleasure and honour that this dissertation has been directed by Dr. H.S. Gopalakrishna.

I welcome this opportunity to express my thanks to Dr. K.S. Amur, Professor and Head, Department of Mathematics, Karnataka University, Dharwar for having provided the necessary facilities throughout the course of the work.

I also owe a great debt to Council of Scientific and Industrial Research, New Delhi and University Grants Commission, New Delhi, for their kind financial support, without which, I think it would not have been possible for me to carry out this work.
I am also indebted to my brothers, who have been the constant source of inspiration throughout the course of my education.

Finally I wish to thank my friends Mr. B.R. Gadagudi, Mr. K.H. Kulkarni, Mr. S.M. Patil, Mr. T.C. Gadad, Dr. V.S. Shetiya, Dr. S.S. Bhusanoormath and others for their co-operation and encouragement all along.

MAY 25, 1976

DHARWAR
