CONTENTS

INTRODUCTION ........................................... 1 - v

CHAPTER 1: Regular functions $f(z)$ for which $zf'(z)$ is a $\alpha$-spiral of order $\beta$ 1 - 35

CHAPTER 2: On a class of functions close to functions of bounded boundary rotation 36 - 71

CHAPTER 3: A generalization of functions with bounded boundary rotation 72 - 89

CHAPTER 4: Coefficient estimates for some classes of spiral-like functions 90 - 104

REFERENCES ........................................... 105 - 110

BIBLIOGRAPHY ........................................... 111 - 115
