Conclusion

Lastly, it is hoped that the recommendations of this study will form a base for the Planners & Decision Makers and the Librarians as well as the Library Authority to frame the policies and programmes on further improvement of the services in engineering colleges of Kota Region in Rajasthan.

Thus, the study is concluded to overcome the weaknesses and drawbacks of the libraries by way of the recommendations and suggestions. It is also hoped the recommendations and suggestions of this study will be not only helpful to the faculty members of Engineering Colleges but also helpful to the students by improving library services of the colleges surveyed but also be equally useful for the other Engineering Colleges in improving their library services.
