Acknowledgement

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of the work whereby I have been accompanied and supported by many people. It is a pleasant opportunity for me to express my gratitude for all of them. The completion of the present work is like the completion of one of the biggest ventures. Dr. Sidhanath V. Bhosale, my guide was the pole star to direct me while passing through this venture. His untiring enthusiasm and integral view on research towards supramolecular chemistry and his mission of providing only high-quality work and nothing less, has made a deep impression on me. His trust and scientific excitement inspired me to making right decisions and I find myself privileged to have worked under their kind guidance.

I am equally thankful to Dr. Sheshanath V. Bhosale and Prof. S. L Patil for intellectual inspiration, scientific encouragement and guidance during the course of my doctoral studies.

Heartily, I would like to thanks to Prof. S. B. Meshram, Hon’ble Vice-Chancellor, Prof. A. M. Mahajan, Registrar, Prof. D. G. Hundiwale, Director, BCUD, North Maharashtra University, Jalgaon for giving me the opportunity to work and providing the basic infrastructure for my research work at the university school.

I express my deep sense of gratitude, indebtedness and sincere thanks to Prof. P. P. Mahulikar, Director School of Chemical Sciences, North Maharashtra University Jalgaon, Dr. J. S. Yadav, Former Director, and Dr. K. V. S. N. Raju, Head, Polymer and Functional Material Division, Indian Institute of Chemical Technology (IICT), Hyderabad for giving me an opportunity to work at the institute and providing the laboratory space and essential infrastructure for my research work.

I owe my sincere thanks and courteous gratitude to Dr. Amulrao U. Borase, Dr. Ramanuj Narayan, Dr. Dipak. S. Dalal, Dr. A. V. Shesha-sainath and Dr. Kiran. K. Sharma for their valuable suggestions and timely help throughout my research.
work. I would never forget the company I had, of my fellows, research scholars and friends from my laboratory. I am thankful to them for lend a hand and cooperation.

I am greatly thankful to

- Dr. Sheshanath Bhosale (School of Applied Sciences, RMIT University, Australia) for assistance of the TEM, AFM, CD and DLS facilities.
- Dr. Akhil Gupta (Department of Materials Engineering, Monash University, Australia) and Dr. Ujjwal Patil (IUCT, NMU, Jalgaon) for assistance of the SEM facility.
- Dr. Dipak S. Dalal (Department of Organic chemistry, NMU Jalgaon) for providing of the UV-Visible and Fluorescence facilities.
- Dr. K. V. S. Rama Krishna (NMR Division, IICT, Hyderabad) for assistance of the $^1$H NMR, $^{13}$C NMR and CD facilities.
- Sophisticated analytical instrument facility, IICT, Hyderabad for assistance of the XRD, Mass and HRMS facilities.
- Dr. Kiran Kharat (Department of Biotechnology, Deogiri College, Aurangabad) for performing the p53 Independent apoptosis.
- Dr. Ganesh Kumar and Mrs. Sujitha Pombala (Natural Product Division, IICT Hyderabad) for performing cytotoxic activity.
- Dr. Dipak Salunkhe and Mr. Ganesh Lonkar (School of Physical Sciences, NMU, Jalgaon) for assistance of the cyclic voltammetry and contact angle measurements.
- Mr. Amit Kumar, (Polymers & Functional Material Division, IICT Hyderabad) for performing TGA/DTG and DSC analysis.
- Staffs of administration, finance, accounts, stores and library of NMU, Jalgaon and IICT Hyderabad.

It is my great pleasure to special and heart full thanks to Dr. Vijay S. Patil, Pruthviraj Shinde and my brother Jitendra P. Nandre who has always supported me for all my research work with great understanding. I would like to take this opportunity to express my sincere thanks to many of my friends and lab mates who
were with me either in the laboratory or outside the laboratory, Dr. Ajay Nikum, Dr. Yogesh Pawar, Dr. Rajendra Jadhav, Namdev Ghule, Ganesh Shitre, Sharad Bobe, Valmik Shinde, Vivek Raut, Shrivani Doli, Mahendra Nevare, Dr. Kamlesh Desale, Aanandsing Patil and Kulvant Nandre. I also wish to thank my other colleagues at School of Chemical Sciences and Department of Organic Chemistry, Nilesh Patil, Dr. Mahesh Patil, Dr. Pramod Nagle, Dr. Dipak Patil, Dr. Santosh Nalage, Jitendra Bhosale, Dipesh Mahajan, Sandip Rajput, Shivkumar Patil and Kishor Pawar.

I am also thankful to departmental non-teaching staff specially Mr. A. A. Shimpi, Mr. Sunil Nikam, Mr. Prakash Patil, Dr. N. B. Patil and Mr. Dipak Ahire for providing us the requirement in laboratory during the project work time to time.

Finally, my thanks to Department of Atomic Energy (DAE) and Board of Research and Nuclear Chemistry (BRNS) Mumbai, India for providing fellowship under the project sanction no. 2009/37/39/BRNS.

The thesis could not have been completed without the endless love and blessings from my family. They are always ready to face any kind of pain, adjustment just for my carrier. I know, till date, I could not give anything to them and just borrowed all the times. Thanks word is very less to appreciate their efforts. Ph.D degree will be awarded to me, but in real sense credit goes to my family and I must remember this throughout the life. At this occasion, I thank to my parents Dada (Mr. Popat) and Mai (Mrs. Latabai) whose enormous support, confidence and in exhaustible patience which is unforgettable for me. I wish to thank my loving sisters Mrs. Harshada and Mrs. Yogita for their love, warmth, understanding and ethics, who taught me the value of hard work and rendered me enormous support during the whole tenure of my research work.

This thesis could not have been possibly brought to a successful culmination without the blessing of Almighty. I bow to him with limitless gratitude and humility. Without His will, this thesis would not have been initiated – nor to mention completion.

Mr. Kamalakar Popat Nandre
