ACKNOWLEDGEMENTS

I express my profound gratitude to my respected teacher Dr. D. M. Manjundappa, the former Professor and Head of the Department of Economics, Karnatak University, Dharwad, for his constant encouragement to me to embark upon this ambitious research venture and for his valuable guidance beginning from the suggestion of the problem till the completion of the study. It has been my great fortune and proud privilege to have been associated with him as his student ever since my post-graduate days. I owe him much for my academic career. He was kind enough to guide me even after his joining the prestigious services of the Government of Karnataka first as Economic Adviser and now as Secretary, Planning Department.

I am immensely grateful to Dr. P. R. Panchamukhi of Bombay University who was the constant source of inspiration to me. As the Head of the Research Unit in Economics of Education, he rendered valuable suggestions and solved all my problems in the course of the development and the completion of this study. He allowed me to see him for discussion anytime I desired.
I am obliged to Dr. N. P. Pandey of the Centre for Multi-disciplinary Research, Karnataka Historical Research Society, Dharwad, for his keen interest in my study. Discussions with and candid suggestions from him enriched my thoughts on various aspects of the subject and were very much helpful to me in developing the study.

I am grateful to Dr. V. K. R. V. Rao, Dr. D. T. Lakdawala and Dr. V. B. Ghuge who evoked interest in me to take up the study and gave me the opportunity to discuss with them some issues connected with the study.

I am deeply indebted to Dr. M. V. Muddapur of the Department of Statistics, Karnatak University for his unstinted cooperation and valuable help in the strenuous work of programming and statistical analysis of the data pertaining to the study. He made himself available to me for consultations anytime I desired on the mathematical and statistical aspect of the study. I have taken many hours of his valuable time to help me in getting the statistical results early and get them interpreted.

I am thankful to Shriyuts B. B. Hadaginal and M. B. Tuppad, lecturers in the Department of Economics, J. S. S.
Arts, Science and Commerce College, Gokak, who assisted me in large measure in the arduous task of collecting the data by canvassing the 'questionnaires' withstanding many inconveniences of the field investigations. My sincere thanks are also due to Dr. V.V. Bagalkoti, Principal of the said college (which I chose as the unit institution for my field investigation) for the encouragement and the help rendered by him in allowing me to have free access to the relevant records of the college to collect the information required for my study.

I also thank the authorities of the Karnataka University for their kind cooperation in providing me the facilities to refer to University records, the library and computer facilities and also for having sanctioned U.G.C. Travel Grants to visit the Research Unit in Economics of Education of the University of Bombay.

I cannot afford to forget Shri Harihar, Programmer Computer Centre, Karnataka University for his favour in programming and computerising the data.
I also acknowledge with gratitude the help and cooperation of many individuals and institutions in conducting the survey for this study.

Finally, I wish to thank the Management, Principal and colleagues of my College who evinced interest in my work and also rendered all possible help in completing the work.

Dharwad (K. R. Madi)
March 1981
