List of Figures iii - iv
List of Tables v

CHAPTER-1: GENERAL INTRODUCTION 1-22

1.0. Introduction
  1.1 General Introduction of Malaria
  1.2 Economic loss due to Malaria
  1.3 Malarial Parasite
  1.4 Traditional Methods for Prevention and Treatment of Malaria
  1.5 Artemisinin Chemistry and Function
  1.6 Introduction of Artemisia annua L.
  1.7 Geographical Distribution
  1.8 Morphology of A. annua
  1.9 Uses of Artemisinin
  1.10 Supply and Demand Regime of Artemisinin
  1.11 Approaches for Improving Artemisinin Production: In Vitro Production
  1.12 Research Objectives

CHAPTER-2: REVIEW OF LITERATURE 23-55

2.0 Reviews on Artemisinin Production
  2.1 Importance of Medicinal Plants
  2.2 General Introduction of Secondary Metabolites
  2.3 Use of Plant Cell Culture
  2.3.1 Suspension Cell Culture of A.annua
2.3.2 Micropropagation of Plants
2.3.3 Root Organ Culture of *A. annua*
2.4 *In Vitro* Production of Artemisinin
2.5 Medicinal Properties of Artemisinin
2.5.1 Anticancer Potential of Artemisinin
2.5.2 Antioxidants Activity
2.5.3 Antimicrobial Activity
2.6 Detection and Quantification of Artemisinin
2.7.1 Solid Phase Extraction System

**CHAPTER-3: MATERIALS AND METHODS** 56-68

3.0 Methodology

3.1 Collection of *Artemisia annua* Seeds.
3.2 Surface Sterilization and Germination of Seeds
3.3 Maintenance of Shoot Culture
3.4 Establishment and Maintenance of Root Organ Culture
3.5 Growth Kinetics of Roots in Shake Flask
3.5.1 Estimation of Glucose
3.5.2 Estimation of Sucrose
3.5.3 Estimation of Phosphorus
3.6 Optimization of Efficient Extraction Procedure for Artemisinin
3.6.1 Solid Phase Extraction of Crude Artemisinin
3.6.2 Qualitative Detection of Artemisinin by using TLC
3.6.3 Qualitative Detection of Artemisinin by using HPTLC
3.6.3.1 HPTLC Analysis
3.6.3.2 Preparation of Samples
3.6.3.3 Reference Solutions and Derivatizing Reagent
3.6.3.4 Chromatography and Evaluation
3.7 Testing of Biological Activity of *A. annua* Cell Culture
3.7.1 Determination of Antiproliferative Activity
3.7.1.1 MTT Assay Protocol
3.7.2 Evaluation of Antioxidant potential by DPPH Assay
3.7.3 Antimicrobial Screening
3.8 Statistical Analysis

CHAPTER-4: RESULTS AND DISCUSSION 69-113

4.0. Results and Discussion
4.1 Viability Testing
4.2 Surface Sterilization of Seeds
4.3 Maintenance of Shoot Culture
4.4 Establishment and Maintenance of Root Organ Culture
4.5 Detection of Artemisinin from In Vitro Grown Roots
4.5.1 Quantification of Artemisinin by HPTLC
4.6 Growth Kinetics of Roots in Shake Flask Culture
4.7 Optimization of Efficient Extraction Procedure for Artemisinin
4.8 Anticancer/Antiproliferative Activity of Artemisia annua extract
4.8.1 Cytotoxicity Assay
4.9 Antioxidant Activity
4.9.1 DPPH Assay
4.10 Antibacterial Activity

CHAPTER-5: SUMMARY 114-127

5.1 Summary

CHAPTER-6: CONCLUSION 128-131

6.1. Conclusion

CHAPTER-7: REFERENCES 132-164
