ACKNOWLEDGEMENTS

I understand that behind any successful work there is a huge list of supporters without whom the task would have been difficult to implement. It is the same in my case too. Now I am submitting my Ph.D thesis and this work would not have been accomplished without the support, help, guidance and blessings of a large number of people. The very first person I would like to acknowledge is my supervisor Prof. N. V. S. Rao with whose help and guidance I have been able to reach this stage in my life. My sir has taught me to overcome difficulties with patience. He taught me to handle the complexities of most problems either be it the experiments or general routine. He has been a constant source of inspiration for me all these years. I appreciate his right approach and timely actions to every problem. My heartiest gratitude to you, Sir for all that I have learnt from you.

My sincere thanks to Prof. S. B. Paul, Prof. M. R. Islam, Dr. C. R Bhattacharjee for imparting knowledge on various topics of research.

Dr. Manoj. K. Paul is the person whom I approached any time and he was there to help and sort out my problem. I have gained immensely from the valuable discussions and express my gratitude for his support and encouragement throughout the period of my research.

There is a giant list of personalities who in some way or the other have supported me all these years of my research work. Through their valuable knowledge and experiences I have gained great confidence in myself and it has helped me immensely. I am grateful to Dr. P. Mondal, Dr. P. C. Paul, Dr. Sk. Jashimuddin, Dr. D. Sengupta, Dr. H. Acharya, Dr. S. Ghosh and Dr. S. Choudhury for guiding me throughout.

I have been lucky enough to get the help and guidance of my seniors without whose help it would have been difficult to do this mammoth task of Ph.D work. I sincerely thank my senior Dr. Zia Uddin Mazumder, Dr. Subhash Debnath for their all time help.

Of course nothing will function properly in our lab without our cooperative and supportive technical staff and lab attendant, I specially acknowledge to Mr. P. R Ramesh, Mr. S. Bhattacharjee, and Mr. B. Nath, Md. J. A. Borbhuiya and Mr. R. Kurmi for their help and support, when it needed most. I am also thankful to office staff Md. J. Borbhuiya for his cooperation.
Certainly this work would not be accomplished without the support and collaboration of my friends Dr. Rajdeep Deb and Dr. Trirup Dutta Choudhury. We formed a tight-knit community during and beyond the lab hours. They were always beside me in all my good and bad times. Their companionship and enthusiasm for chemistry not only gave me motivation to do quality work but also made working in the laboratory much more pleasant. I also like to thank Rahul, Nimalangshu, Atiqr, Venkatesh, Somen, Golam, Lopamudra, Dipika, Gayatri, Kalpana and Nazma for their help and respect.

I am thankful to Dr. D. S. Sankar Rao of CSMR, Bangalore for doing X-ray diffraction of some of my samples. I am also thankful to BHU, Varanasi, CLRI, Chennai, RSIC, Shillong for doing NMR analysis.

I owe to Mrs. N Anantalaxmi for her motherly support and encouragement.

Nothing can be accomplished without family support. My sincere thanks to my mother and father for supporting my decision to do Ph.D. My heartiest thanks to them for being with me always. My greatest thanks go to my beloved wife Sipra for her constant inspiration and support. I greatly owe to my family. I would like to express my sincere thanks to my brother, aunts, uncles and cousins who have always infused confidence in me and boosted me to go ahead and accomplish this task. I greatly owe to my in-laws for their support and care throughout this period. It is only through the care and blessings of all my family that I have been able to pursue my aim in life. I thank you all from the bottom of my heart.

Ph.D is not the job of a single person. It is the work of all who supported you and tolerated you throughout this difficult period. I once again would like to thank all of you for being with me always.

Date: March, 2011
