### INDEX TO TABLES

**Tables in the Text**

1. Behaviour of Prices and Related Variables during the Three Five Year Plans ................................................. 77
2. Percentage Contribution of Constituent Groups of Commodities to the General Price Level ..................................... 91
3. Behaviour of Prices and Production of Important Agricultural Commodities .......................................................... 95
4. Commodity Terms of Trade (Index Numbers with 1962-55 = 100) and Relative Agricultural Incomes ......................... 104
5. Exponential Trend Equations (Fitted to Index Numbers of Wholesale Prices and Production of Agricultural Commodities) ........................................ 109
6. Index Numbers of Wholesale Prices, Adjusted for Trend ......................................................................................... 111
7. Index Numbers of Production, Adjusted for Trend .............................................................................................. 112
8. Co-efficients of Variation of the Index Numbers of Prices and Production, Adjusted for Trend ................................ 113
9. Production of Animal Protein ................................................................................................................................. 143
10. Regression Equations Explaining Prices .................................................................................................................. 158
11. Working Class Consumer Prices and Wages ............................................................................................................ 155
12. Increases in the Cost of Living and Wages ................................................................................................................. 158
13. Index Numbers of Daily Agricultural Wages and Consumer Prices for Agricultural Labourers in 1965 (Base 1961= 100) ........................................................................................................ 176
15. Harvest and Wholesale Prices (1958-63 = 100) 201
16. Wholesale Prices of Wheat (Index Numbers) 204
17. Annual Rate of Increase in Agricultural Production and Area Cultivated (Per cent) 216
18. Capital Formation in Indian Agriculture - Gross and Net 220
19. Sum of Elasticities of Production with respect to different inputs Obtained from Cobb-Douglas Production Functions fitted to Various Crops 236
20. Market Response of Farmers to Production with prices given (Hypothetical) 244
22. Quarterly Market Arrivals of Rice and Wheat in India as Per cent of the Total for the Respective Years 260
23. Fluctuations in Cereal Production 269
24. Production, Procurement and Imports of Rice and Wheat 385

Appendix Tables

I Index Numbers (1958-53 = 100) of Wholesale Prices of Groups of Commodities (Average of Months) 371
II Index Numbers of Wholesale Prices of Important Commodities, 1958-53 = 100 (Average of Months) 375
III Major Economic Indicators (other than wholesale Price Indices) 376
IV Index Numbers of Agricultural Production, 1949-50 = 100 377
V Cotton Statistics 378
VI Index Numbers of Consumer Prices (Agricultural Labourers), 1950-51 = 100 379
VII Index Numbers of Agricultural Wages in 1965, 1961 = 100 381
VIII Volume and Pattern of Saving 382
IX Data on Cotton Textiles 383
X Index Numbers of Area Under Agricultural Crops and Agricultural Productivity, 1949-50 = 100 384
