ACKNOWLEDGEMENTS

Any research endeavour in the realm of Science or Art reflects the efforts and support of many people. Similarly, this study too received tremendous support and encouragement in innumerable ways from my teachers, friends and colleagues.

A questionnaire-based survey of this type would not be possible without the support and help of the participants who volunteered their time and energy in filling in the long questionnaire. They, undoubtedly deserve a special note of appreciation and thanks. My sincere thanks are also due to my friends from different Special Schools and Institutions for taking the burden of collecting the dully filled in forms from the respondents and promptly returning them to me.

A special note of thanks and gratitude goes to my guide Prof. C.R. Karisidappa, Department of Library and Information Science, Karnataka University, Dharwad, for graciously accepting me as his student against many administrative hurdles in the initial stages of my registration. His constant support and guidance inspired me to accomplish the task within reasonable time.

I owe a great depth of gratitude to my teacher Prof. M.V. Venugopal, Department of Library and Information Science, Osmania University, Hyderabad, who was most generous in sparing his time for fruitful discussions on the topic and offering constructive suggestions and logistic approaches into the problem.

My sincere thanks to Dr. P. Vyasaamoorthy, Manager, Information Services (International Business Group), Satyam Computer Services Ltd., Secunderabad for providing useful suggestions on information technology aspects of the proposed network (NADINET).
I am extremely grateful to Dr. D.K. Menon, Director, National Institute for the Mentally Handicapped, Secunderabad for permitting me to pursue this research work. Thanks to Shri L. Govinda Rao, Deputy Director [Admn.] of NIMH for his encouragement and administrative support.

My thanks must also be extended to my colleagues Dr. S. Venkatesan, Lecturer, Department of Psychology for his support in designing the programs for structuring/coding the contents of the questionnaire and analysis of data on computer; and to Dr. Jayanthi Narayan, Assistant Professor of Department of Special Education, for her valuable criticism yielding ideas of great importance for the study.

My sincere thanks and deep appreciation are also due to my coworkers Mr. K.S.S. Subba Rao for uncounted hours that he spent in entering data and printing it expertly on laser printer and to Mr. V. Ravi Kumar for his cooperation in DTP works.

I am also thankful to many friends and wellwishers, innumerable to mention here, for their moral support and encouragement.

Lastly a special note of appreciation to my wife, Anu for patiently bearing with me during the long period of this research work. She has been extremely helpful and cooperative during the completion of the study.

Date: 29, November 1995
