PREFACE

In this work, Professor K.J. Shah has been my guide. However, Professor Armando Menezes and Dr. K. Raghavendra Rao have helped me in the course of my work. Professor Menezes has helped me in editing the final draft, in respect of both diction and thought. Dr. Raghavendra Rao went through the first and the pre-final draft and made a number of valuable suggestions. Professor Shah has been more than a formal guide. In fact, the thesis, in many places, attempts to present and develop some of his ideas on the problem of the thesis. However, the responsibility for the last draft is entirely mine.
