ACKNOWLEDGEMENT

First of all, I thank the Lord Almighty for enabling me to finish this work successfully.

I wish to offer my sincere thanks and gratitude to my research guide and supervisor, Dr. A. Rajendran, M.Sc., M.Phil., Ph.D., Assistant Professor of Chemistry, Sir Theagaraya College, Chennai-21 who has not only been a guide but also a real driving force behind my attempt. His dedication, affection, cooperation, benevolence and absolute mastery of the subject gave me enough strength and adequate support to accomplish this piece of this task. I am extremely blessed enough to have his esteemed guidance throughout this work.

I express my deep sense of gratitude to the Vice-Chancellor, Bharathiar University, Coimbatore, for allowing me to do this research work in the Research and development Centre, Bharathiar University, Coimbatore.

I am extremely grateful to the Dean, Research and development Centre, Bharathiar University, Coimbatore for his kind helps as when approached.

I wish to extend a special word of thanks to Dr. M. Subramanian, the Principal, Government Arts College, Thiruvannamalai, for all his valuable helps rendered whenever sought.
I wish to accord my sincere thanks to Head, all my colleagues and non-teaching staff working in the Department of Chemistry, Government Arts College, Thiruvannamalai, for their valuable helps and useful suggestions.

My profound thanks to my friend and former colleague Mrs. C. Deepa, Assistant Professor, Department of Chemistry, Bharathi Women’s College, Chennai for her spontaneous helps and keen interests in my work.

Last but not the least, it is my bounden rather than perfunctory duty to appreciate the great sense of understanding and spirit of forbearance that all my family members, especially my parents, my husband and my children, who remarkably exercised during many a crucial stage of this work.
