

LIST OF TABLES

Table 1: Classical examples of serious and unexpected adverse reaction.....	14
Table 2: Prescribing practices of dermatologists and general practitioners (GP) while prescribing isotretinoin.....	49
Table 3: Line listing of spontaneous adverse drug reactions reported at KEM Hospital..	56
Table 4: Comments by WHO expert for cases entered in WHO database.....	62
Table 5: Number of AE reports collated, Processed in Vigiflow and analyzed by country and class of drug.....	69
Table 6: Line listing of AEs from Botswana.....	71
Table 7: Line listing of AEs from Sudan.....	87
Table 8: Line listing of AEs from Zimbabwe.....	97
Table 9: Frequency of AEs in diabetic patients.....	117
Table 10: Types of AEs observed in patients.....	118
Table 11: AEs observed in patients on insulin, oral hypoglycemic agents and its combination.....	119
Table 12: Assessment of AEs	120
Table 13: Root cause analysis of preventability of AEs in diabetic OPD.....	121

Table 14: Demographic details of patients of IM group.....	131
Table 15: Treatment regimen in IM group.....	132
Table 16: Adverse events to antiretroviral combinations in IM group	136
Table 17: Risk factors for AEs to anti-retrovirals	138
Table 18: Demographic details of patients of SR group	140
Table 19: Treatment regimen in SR group.....	140
Table 20: AEs to antiretroviral combinations in spontaneous reporting group (SR group).....	141
Table 21: Mean time of exposure before developing AEs.....	143
Table 22: Causality, preventability and severity of adverse events for IM and SR group.....	144
