I have to confess that I owe a great debt of gratitude to several people and several works whom it is impossible to enumerate fully and completely. A research work draws heavily upon the resources and contributions of many great scholars, guides and teachers. I can express my gratitude only partially and with a feeling of incompleteness towards the many who have helped me in my work.

I must place on record my gratitude to my research guide Dr. R.V. Dadibhavi, Reader, Department of Economics, Karnatak University, Belgaum Campus, Belgaum. I have drawn heavily upon his kindness, valuable time and intellectual resources. I may mention particularly the training he imparted to me in the application of quantitative techniques in the present work. His constant encouragement made it a pleasure to work with him. I can not adequately express my heartfelt gratitude to him.

I thank the authorities of the Institute for Social and Economic Change, Bangalore, and ICSSR., New Delhi, for having given me an opportunity to participate in the research methodology course conducted during April/May 1987. During the course I was greatly helped from the discussions with Dr. V. S. Satyapriya, Dr. M. V. Nadakarni, Dr. Abdul Aziz, Dr.H.G. Hanumappa and Dr. R.S. Deshpande. I am indebted to them.

I also thank Dr. V.N. Kothari, M.S. University of Baroda, Baroda and Dr. Hans P. Binswanger, The World Bank, Washington, D.C., U.S.A., who wrote to me and sent the necessary literature for my research work.
I take this opportunity to thank the officials of the State Bureau of Economics and Statistics, Bangalore and District Statistical Office, Belgaum who provided me with published and unpublished data and other research material.

I have drawn from the resources of the Libraries of the Institute for Social and Economic Change, Bangalore, Karnataka University, Dharwad and Belgaum campus and Lingaraj College, Belgaum. I thank all the Library Staff for their co-operation.

I shall be failing in my duty if I do not express my gratitude to the Management of K.L.E. Society, Belgaum, for permitting me to do the research work.

I acknowledge my debt to Prin. S.G. Kallur, Prin. Dr. S.G. Ghivari, Prin. C.C. Dixit and Prof. M.I. Ipe for their constant and unstinted encouragement.

I particularly thank Sri. R.S. Masali and my colleagues in the Department of Economics of my college Sri. S.B. Somannavar, and Sri. S.C. Mathapati who have helped me in the collection of the data. In addition, I wish to express my sincere gratitude to Prof. S. Krishna, Department of English, R.L. Science Institute, Belgaum for his invaluable help. I thank Sri. Humani for the two neat maps which he has contributed.
I am also grateful to Sri. Umesh Hegade, Sri. Vilas Karjinni, Sri. Basavaraj Neelgar, Sri. Basavaraj P. C. and Sri. Santosh Maggavi who helped me in obtaining the results of my work through computer programming. My thanks are also due to Krupa Computers, Shahpur, Belgaum and Sri. A.S. Bhoi for their diligent typing.

It is no exaggeration to say that what little I have achieved in my life has been made possible by the example by precept and practice of my revered parents. I express my sincerest gratitude to them for their gentle guidance persuasion and inspiration. I owe a great debt of gratitude to my wife for her patience and devoted cooperation during the production of this thesis.

S. S. Magali
Department of Economics,
Lingaraj College,
Belgaum.
