

LIST OF TABLES

Table 1.	Phenotypic tests used for identification of <i>Enterococcus</i> species.....	27
Table 2.	Susceptibility profiles of genes that mediate resistance to aminoglycoside synergism in enterococci.....	62
Table 3.	Characteristics of the types of resistance to glycopeptide antibiotics found in enterococci.....	64
Table 4.	NCCLS guidelines for disk diffusion and dilution susceptibility testing for <i>Enterococcus</i> species.....	67
Table 5.	Screening methods for detecting vancomycin and high-level aminoglycoside resistance in enterococci.....	68
Table 6.	Prevalence of different species of enterococci.....	94
Table 7.	Prevalence of Enterococci among various clinical specimens.....	95
Table 8.	Distribution of <i>Enterococcus</i> species among different clinical specimens.....	95
Table 9.	Conventional biochemical Phenotyping results of enterococci.....	97
Table 10 a.	Antibiotic susceptibility pattern of enterococci by Kirby-Bauer disc-diffusion method.....	114
Table 10 b.	Antibiotic susceptibility pattern of urinary enterococci.....	114
Table 10 c.	Antibiotic susceptibility pattern of <i>E. faecalis</i> and <i>E. faecium</i>	115
Table 10 d.	Antibiotic susceptibility pattern of unusual <i>Enterococcus</i> species.....	116
Table 10 e.	Antibiotic susceptibility pattern of unusual <i>Enterococcus</i> species.....	116
Table 11 a.	MIC testing results of enterococci by agar dilution agar/screening method.....	117
Table 11 b.	MIC testing results of <i>E. faecalis</i> and <i>E. faecium</i>	119
Table 11 c.	MIC testing results of unusual species of enterococci.....	120
Table 12.	Multiplex-PCR results for HLAR enterococci.....	121
Table 13 a.	Plasmid REA and DNA hybridization results.....	151
Table 13 b.	Plasmid REA and DNA hybridization results.....	152
Table 14.	Prevalence of Virulence factors among Enterococci.....	164
Table 15.	Distribution of Virulence factors among various clinical specimens.....	168

Table 16.	Clumping response of <i>E. faecalis</i>	186
Table 17.	Filter-Mating experiments of HLGR-PCR positive <i>E. faecalis</i>	187
Table 18 a.	Molecular typing results by PFGE and Plasmid REA.....	216
Table 18 b.	Molecular typing results by PFGE and Plasmid REA.....	217
Table 19.	Statistical analysis-Simpson's index of diversity and Confidence interval.....	218
