ACKNOWLEDGEMENTS

I owe much to my informants, who at the informal as well as the formal level responded patiently of my queries. Though I am one of the speaker of this speech community, by and large, they were very co-operative with me, without their affectionate consideration and co-operation I could not have completed my research work satisfactorily.

I wish to place on record my sincere gratitude to my teacher and guide Dr. A. Murigeppa. His valuable suggestions, help, encouragement and guidance which were profusely given time after time helped me in bringing out this Thesis in the present form.
