CONTENTS

I. INTRODUCTION

1.1 Chemical kinetics

1.2 Oxidation and reduction reactions

1.3 Chromium(VI) reagents
   1.3.1 Chromium trioxide
   1.3.2 Sarett reagent
   1.3.3 Collins reagent
   1.3.4 Etard reaction

1.4 Toxicity of Cr(VI) reagents

1.5 Cr(VI) compounds

1.6 Cr(VI) as an oxidant
   1.6.1 Oxidation with chromic acid
   1.6.2 Oxidation with chromyl chloride
   1.6.3 Oxidation with jones’ reagent
   1.6.4 Oxidation with sodium dichromate
   1.6.5 Oxidation with silver chromate and iodine
   1.6.6 Oxidation with compounds of Cr(VI) and heterocyclic bases

1.7 Linear free-energy relationships

1.8 Literature survey on benzyltriethylammonium chlorochromate

1.9 Literature survey on morpholinium chlorochromate

1.10 Literature survey of oxidation kinetics of phenols

1.11 Literature survey of oxidation kinetics of anilines

1.12 Literature survey of oxidation kinetics of cyclケットones

1.13 Literature survey of oxidation kinetics of chalcones

II. SCOPE OF THE WORK
### III. EXPERIMENTAL METHODS

3.1 Preparation of morpholinium chlorochromate
3.2 Preparation of benzyltriethylammonium chlorochromate
3.3 Purification of phenols
3.4 Purification of cyclicketones
3.5 Purification of anilines
3.6 Preparation of chalcones
3.7 Purification of acetic acid
3.8 Water
3.9 Other reagents
3.10 Evaluation of rate constant
3.11 Evaluation of thermodynamic parameters
3.12 Kinetic measurement for the oxidation of phenols by BTEACC
3.13 Kinetic measurement for the oxidation of anilines by MCC
3.14 Kinetic measurement for the oxidation of cyclicketone by BTEACC
3.15 Kinetic measurement for the oxidation of chalcones by MCC

### IV. RESULTS AND DISCUSSION

4.1 Kinetics and mechanism of oxidation of phenols by BTEACC in aqueous acetic acid Medium with 1, 10 – phenanthroline as catalyst
4.2 Kinetics and mechanism of oxidation of anilines by morpholinium chlorochromate
4.3 Kinetics and mechanism of oxidation of cyclicketones by BTEACC in aqueous acetic acid medium with 1, 10-phenanthroline as catalyst

4.4 Kinetics and mechanism of oxidation of chalcones by morpholinium chlorochromate with oxalic acid as catalyst

V. SUMMARY

APPENDICES

Appendix – A Selected values of σ

Appendix – B Evaluation of errors in kinetic data

Appendix – C List of symbols and abbreviations

Appendix – D Papers presented in conferences

Appendix – E Papers published/accepted/communicated
