ACKNOWLEDGEMENT

At the most prior, I would sincerely acknowledge my research supervisor Dr. A. S. Prakash, whose support and effort made the completion of this work possible. I am thankful to him for introducing me to the exciting research field of ‘Electrochemical energy storage’. It is a great fortune to learn fundamental electrochemistry and all other related techniques from him. I learnt scientific ethics, smart work, management skills from him. Dr. Prakash, through his enthusiasm, work spirit, leadership and modesty has motivated and encouraged me throughout my Ph.D period. I would thank him again for providing me the opportunity to conduct my research on lithium ion battery materials under his excellent supervision.

I would extend my sincere thanks to Dr. K. Ramesha, for his guidance mainly on crystallography and material science. I learnt a lot from his very personality, scientific ideas and being always grateful to science. I am particularly thankful to him for his kindness in sharing his ideas and scientific clarifications. I would further credit him to improve my experimental and analytical skills. I also thank him for being in my research committee and providing me useful advices and suggestions.

I am thankful to Prof. A. K. Shukla (Ex-Director, CECRI) Professor, IISc for his enormous support all the way through my Ph.D period and also for extending some of the characterization facilities at SSCU, IISc Bangalore. I would extend my thanks to Dr. V. Yegnaraman (Ex-Director, CECRI) and Dr. K. Vijayamohan (Acting Director, CECRI) for their continuous help and support. I am thankful to CSIR- India for providing me the financial support from Fellow- QHS scheme and CSIR- SRF fellowship.

My sincere thanks to Prof. Jean Marie Tarascon, LRCS, France for useful discussions and crucial in-situ studies. I would be thankful to Dr. D. Jayakumar, Head, Functional Materials Division for providing all facilities and nonstop support especially during difficult situations. His help and support made my research life easier and enjoyable. I extend my thanks to Dr. S. Pitchumani and Dr. P. Sridhar of CECRI-Madras Unit for providing me the opportunity to use the facilities in CECRI-Madras unit. I would also thank all scientists of CECRI, especially Dr. P. Periasamy
(Head, Battery division) and Students Advisory Committee members for their continuous support and helps. I am thankful to all characterisation staffs of CECRI-Karaikudi for their help in characterization facilities. Thanks also go to administrative staffs for their help in official matters.

In addition I would like to thank all my colleagues at CECRI, specially my lab mates Mani, Suda, Nilesh, Mahima, Senthil, Hema, Bharath, Banu for providing a pleasant social atmosphere and a good working environment. During my four years of Ph.d period, I have availed many help from my friends and room-mates. I would like to individually express my gratitude and deep respect to my friends Hari Prakash (Indocel), Vidhya Hari, Sangeetha, Tintula, Arun, Ananth, Nithya, Bhuvana, Babu, Rajasekar, Harish, Prabhu, Dhivya (Lennox), Saranya (TCS) for their love and friendship.

I cannot thank enough to my family members; Appa, Amma, Anna, Anni and Ramya for their tremendous love, emotional support and encouragement, which was indispensable for my studies all the way. I specially thank my cute child (Nephew) Sarvesh who always cheered me up whenever I struggled.
