Acknowledgements

The entire work presented in this Thesis has been carried out under the constant encouragement and extremely valuable guidance of Dr. J. R. Tonannavar. It gives me great pleasure to express my sincere and heartfelt gratitude to him for his extremely valuable guidance and the meticulous care he has taken to go through the Thesis. I take this opportunity to express my deep sense of gratitude to madam, Dr. J. V. Yenagi for her kind encouragement, and sustained interest, that I received from her during my tenure as a research student. I am grateful to Professor N. S. Sankeshwar, my teacher and former colleague for his encouragement in starting my research work.

I am greatly indebted to Professor B. G. Mulimani, Vice Chancellor, Gulburga University, for his special efforts, while he was Programme Coordinator of the COSIST, in getting Gaussian software package to the Group. Prof S. Umapathy’s (Dept of IPC, IISc, Bangalore) help in the implementation of the Gaussian is gratefully acknowledged. I acknowledge Prof. Tom Sundius, the Netherlands, valuable help in running MOLVIB package. SAIF, Indian Institute of Technology, at Chennai and Mumbai is gratefully acknowledged, for the Raman spectral measurements. I also acknowledge UGC for deputation under 9th plan faculty improvement programme. I am grateful to Prof John Kuri, former principal of Kittel Science College and the management of KND, CSI, BMHEC Centre Dharwad, for their encouragement in my research work.

I thank Professor A. M. Karguppikar, former Chairman, and Professor S. S. Kubakaddi, present Chairman, Department of Physics, for their help and constant support. I thank Professor B. Hanumaiah, Director, USIC, KUD for providing the FT-IR facility. I thank Mr. I. H. Kadlimatti at USIC, for the IR spectral measurements. I thank the library staff at the S.S. Basavanal Library and Dept of Chemistry for their
help during these years. I sincerely thank my present Research Associate, Miss Anuradha, for her valuable help during the preparation of the Thesis and for assistance in checking the manuscript. I thank my friend C.S. Hiremath for his affectionately sustained cooperation and take this opportunity to acknowledge the help rendered by all research colleagues. I wish to express my appreciation to all the members of the non teaching staff, who helped me directly or indirectly during the period of this work.

Lastly, I would like to acknowledge the constant support and encouragement from my wife Christina who has taken maximum responsibility of the family during this period and my young children Henrietta and Justina, who have born inconveniences during the work and it is to them this work is dedicated.
