Acknowledgements

I have a great pleasure in writing this preface as it provides an opportunity to thank many people who have helped me to complete this thesis.

Dr. R. V. Dadibhavi, Professor, Department of Economics, Karnataka University Dharwad, under whose able guidance I have completed this work has been a source of inspiration to me. But for his encouragement, patience and guidance, this work would not have been completed. I am most grateful to him for providing the intellectual stimulus during the course of this work. I feel proud to mention in particular that the training he gave me in the use of quantitative techniques was of great help for this work. It was pleasure to work under him as Project Fellow in UGC major Research Project “Reforms and Regional Disparities: Convergence or Divergence?”, of which he was the Principal Investigator.

My special thanks to Dr. S. T. Bagalkoti, faculty, Department of Economics, Karnatak University Dharwad, for helping me in each and every step.

I am grateful to Karnatak University Dharwad for granting me Research Fellowship to pursue this study. The library staff of KUD have been very helpful to me, which I gratefully acknowledge here. The United Nations Depository Center of KUD Library provided wealth of information related to my work.

With gratitude I acknowledge the invaluable co-operation extended to me by the staff of Jawaharlal Nehru University (JNU) Library, New Delhi, India Investment Centre, New Delhi, Reserve Bank of India, New Delhi and Secretariat of Industrial Assistance New Delhi in collecting necessary information and data.

With gratitude I acknowledge the valuable suggestions provided to me by Dr. K. Kadakodi, L. Venkatachalam and by H. K. Amarnath, of Institute For Social and Economic Change, Bangalore, where I worked for eight months. My special thanks to K. Venkatesh, Librarian at ISEC library, for keeping me informed about the latest arrivals, publications and data related to my work.

My thanks to all the faculty members of Economics Department Karnatak University Dharwad for their help and support at various stages of my work.

With due respect, I thank my parents, grandparents, sister and all my relatives and friends for their support and encouragement. Special thanks to my husband who has given me much without expecting anything in return. This work is a result of his encouragement, personal sacrifices and support in many ways. He not only provided all the facilities for me to work but also kept me free from many household responsibilities to see my work completed.

I am obliged to R. K. Hegde of Krupa Computers who undertook the skillful task of doing the final computer work. Without his help, this thesis would not have taken its present shape.
