Acknowledgements

'Thanks' has just become a common word in return to any favour, but Guru Sakshath – Parabrahma. Right from the bottom of my heart, I express the sense of gratitude to my research guru Dr. Hanumappa B Walikar, whose intellectual thoughts and excellent guidance has helped me to be successful in my research.

I am highly grateful to Dr. Swaroop Reddy, Dr. Hymavathy Reddy and Late. Dr. Y.M.Madar, who were the important link, to bring me to Dharwad and introduce to Karnataka University.

My sincere thanks to the supportive staff and ever encouraging Management that made my research work so much easy. The College endure my absence, while the Department of Mathematics, shared my teaching load.

I thank my senior and junior research colleagues whose timely help and team work, kept my momentum going.

I also thank the student community whose co-operation in patience listening to my lectures since 17 years had helped me to learn more and perform better. This in turn has resulted in contribution to my research. In particular, few students helped me in writing the Computer program, which I have included in this thesis.

I am indebted to my loving and caring family whose sacrifice in many ways had helped to reach my goal.

There is a finite set of vertices that has directly or indirectly adjacent to my work and result in complete graph. I take this opportunity to thank all the elements right from ‘a’ to ‘z’ enclosed in a big bracket with a Big heart.

- L Sudershan Reddy
